CONSENT ITEM

Consent items are routine items handled together in one action. Any committee member or member of the public may request an item be removed from the Consent section for discussion as an individual item.

2. Accept record of August 11, 2025 meeting (Attachment A)

REPORTS FROM COMMITTEE MEMBERS AND STAFF

3. Review IHC Trust Fund Fiscal Year Report (Attachment B) (5 Minutes). Staff will provide the committee with Trust Fund expenditures and anticipated revenues.
4. Reports from Committee Members and Staff (Attachment C) (10 minutes). Staff will provide the current list of IHC Staff projects and their status.

DISCUSSION/ACTION ITEMS

5. Bollinger Canyon Pedestrian Bridge (Chris Weeks).
6. San Ramon Double Tracking Project (Carl Roner) (5 Minutes).
7. California Trails and Greenways Conference (Carl Roner) (5 minutes).

The next meeting is currently scheduled for February 9, 2026.

Adjourn

The Committee will provide reasonable accommodations for persons with disabilities planning to attend the Committee meetings. Contact the staff person listed below at least 72 hours before the meeting. Any disclosable public records related to an open session item on a regular meeting agenda and distributed by the County to a majority of members of the Committee less than 96 hours prior to that meeting are available for public inspection at 255 Glacier Dr., Martinez, CA 94553, during normal business hours. Staff reports related to items on the agenda are also accessible online at www.contracosta.ca.gov. If the Zoom connection malfunctions for any reason, the meeting may be paused while a fix is attempted. If the connection is not reestablished, the committee will continue the meeting in person without remote access. Public comment may be submitted via electronic mail on agenda items at least one full work day prior to the published meeting time.

7. Discussion/Action Items

Chris Weeks from the City of San Ramon provided a brief update on the status of the Bollinger Canyon Pedestrian Bridge, which had a ribbon cutting on July 19. The committee watched a video of the construction and looked at photos of the lighting system. He also spoke of the Crow Canyon Bridge Road bridge, where design is being initiated by San Ramon.

Carl Roner provided a brief update on the San Ramon Double Tracking Project, which is currently in 35% stages of design. Drawings were provided to committee members.

8. Consider agenda topics and date for next meeting

The next meeting date is November 10, 2025. Topics to be discussed include the status of San Ramon Double Tracking Project, the design of San Ramon's Crow Canyon Pedestrian Bridge.

The meeting was adjourned at 5:25 p.m.

LAST UPDATE	PROJECT NAME	TYPE OF PROJECT	LOCATION	DESCRIPTION	STATUS
8/9/2022	Encroachments	Trees, fences, bridges, pavers, etc.	Corridor-wide	Staff continues to find encroachments in the IHC, and sends letters to property owners to remove them. If the encroachment is a fence that is not encroaching on Kinder Morgan's easement, the property owner will be required to enter into a license agreement and pay an annual fee for the encroachment to remain.	Staff is continuing to work with property owners in Pleasant Hill, Alamo, Danville and San Ramon. New encroachments are addressed as they become apparent (Ongoing.) Currently working on a license agreement with the New Life Church for access to the trail. The church seems to be unwilling to obtain the appropriate insurance. Six residents along the trail were notified of encroachments or illegal dumping in the Corridor.
8/9/2022	Flood Control Line F1	Storm Drain	Alamo: between South Avenue and Las Trampas Road	The purpose of this project is to address flooding at the intersection of South Avenue and La Serena Court. The proposed project will construct a drainage line that will connect with the existing drainage network and reduce flooding in the area. The newly created drainage line (Line F-1) will consist of a 24" to 30" pipe that will run along the Iron Horse Trail Corridor from existing line Line "F" at Las Trampas Road (1300 ft.), to the intersection of South Avenue. From this point the pipe will extend another 180 ft. to the southwest, to the intersection of South Avenue and La Serena Court where two drainage inlets will be constructed. (Fig.1) Line F-1 will be added to Drainage Area 13.	Flood Control has finalized pipe alignment working with utility agencies (i.e., Kinder Morgan, CCCSD, EBMUD.) The preferred alignment is between KM line and CCCSD line. Planning has been completed. The project will be sent to Design when their availability improves.
1/24/2019	Move IHC Record of Survey to a GIS Layer	Administrative	Corridor-wide	The existing Record of Survey CADD files showing all current easements, license agreements, etc. were updated. Staff is now working on conversion to a GIS layer.	Survey has created a KMZ index for the ~100 sheets of the IHC records of surveys. These currently link to an archive on the G drive and Surveys has created another version with the links to point to the public portal (LaserFiche) locations. (Ongoing.)
4/26/2013	Risk Assessment	Administrative	Corridor-wide	The County contracted with ENGEO to perform a risk assessment for the IHC. This assessment will include assembling all sampling data for the IHC, identify areas that have no sampling data and make recommendations on what use can be allowed/not allowed.	ENGEO gathered data. Staff will request County Haz Mat to review/approve recommendations so that staff and the advisory committee will have this information to respond to requests for improvements within the IHC. Ongoing.
4/8/2024	Kinder Morgan Release on South Broadway, Walnut Creek	Ongoing soil and groundwater remediation	Walnut Creek	Ongoing investigation and remediation work in Walnut Creek over release plume.	The RWQCB has approved monitoring and natural attenuation as a potential remediation method. They will be evaluating this over the next few months. (Ongoing) Floating product continues to be found in the immediate vicinity of the spill, but has mostly dissipated at any distance from the spill site. Petroleum products are not being found in surface water. The floating product is being removed manually when the wells at the source are sampled.
