RE: CDVR25-01045
37 TERRA BELLA DR
APN: 180 310 014
Service Request #: SR0025080

Dear DULCE RECKMEYER-WALTON :

Contra Costa Environmental Health (CCEH) has received a request for agency comment regarding the above referenced project. See below for our comments grouped by environmental health program:

- If an onsite water supply well is used for this project, it must meet current standards, including construction, yield, water quality, and setbacks. A hydrogeological study may be required to ensure adequate water supply.
- A permit from CCEH is required for any well or soil boring prior to commencing drilling activities, including those associated with water supply, environmental investigation and cleanup, or geotechnical investigation.
- Any abandoned wells (water, environmental, or geotechnical) and septic tanks must be destroyed under permit from CCEH. If the existence of such wells or septic tanks are known in advance or discovered during construction or other activities, these must be clearly marked, kept secure, and destroyed pursuant to CCEH requirements.
- If this project is not served by sanitary sewer and an onsite wastewater disposal system (septic system) is needed for this project, a permit from CCEH is required prior to installation. The new septic system, including disposal field replacement area must comply with current standards. Holding tanks for sewage disposal are prohibited unless these are owned and maintained by a public entity.
- For proposed subdivisions/minor subdivisions served by onsite wastewater disposal systems (septic systems). It must be demonstrated that each lot can accommodate a septic system meeting current standards, including disposal field replacement area.
- For proposed subdivisions/minor subdivisions served by onsite private water wells. It must be demonstrated that each lot has a water supply well meeting current standards, including construction, yield, water quality, and setbacks. A hydrogeological study may be required to ensure adequate water

supply.

- If the project will require a small public water system, these systems must operate under permit from CCEH. The water supply (e.g. well) must meet current standards, including construction, yield, water quality, and setbacks. A hydrogeological study may be required to ensure adequate water supply.
- If the proposed lot line adjustment involves properties served by an onsite waster disposal system (septic system). The new lot configurations must accommodate the septic system(s), including the disposal field replacement area(s), without conflicting with current standards (e.g., setbacks to property lines).
- If the proposed lot line adjustment involves properties served by an onsite water well. The new lot configurations must not conflict with current standards (e.g., setbacks to property lines).
- Horse boarding facilities are subject to the requirements of the Contra Costa County Cleanwater Program, including routine inspections. The applicant can contact CCEH for details.
- It is recommended that the project be served by public sewer and public water wherever possible.

These comments do not limit an applicant's obligation to comply with all applicable laws and regulations. If the proposed project is subject to regulation by CCEH, the project tenant must apply for all applicable health permits. Should you have any questions, please do not hesitate to contact Environmental Health at (925) 608-5500 or CoCoEH@cchealth.org.

Sincerely,

A handwritten signature in black ink, appearing to read "Kristian Lucas". The signature is fluid and cursive, with a long horizontal stroke at the end.

SUBJECT: 37 Terra Bella Dr., Walnut Creek
APN: 180-310-014, Central San Response

Dear Dulce Reckmeyer-Walton,

According to Central Contra Costa Sanitary District (Central San) records, the project site is within Central San's service area and is currently receiving sewer service.

Development Information: *(Based on the information provided)*

- **Existing Use:** Single-Family Residential
- **Planned Project Description:** The applicant requests approval of a variance to allow a 3-foot side yard (where 10 feet is the minimum required) to construct a 350-square-foot carport

Site-Specific Development Conditions:

- Any proposed improvements that will impact the existing exterior side sewer or the related appurtenances will require a Central San Permit prior to alteration.
- Prior to receiving a building permit, the applicant should promptly submit hard-copy, full-size improvement plans to Central San Permit Counter located at 5019 Imhoff Place, Martinez. Staff will review and advise on any applicable fees due. For more information, the applicant should contact the Central San Permit Section at (925) 229-7371.

Sincerely,

Michelle Peon Del Valle
Engineering Assistant
