# Beacon's US Outlook

**WSJ Recession Probability Forecast**  
Chance of US entering a recession in the next 12 months

## We aren't worried now...

- Household finances look great, which means consumer demand is strong
- Inflation has cooled and the Fed is backing off and rates are coming down

## ... but we are worried.

- Bubbly asset prices, yawning Federal deficits, external imbalances are all unsustainable
- False narratives driving bad policy

## The new administration?

- We don't know what they will do, pros and cons for growth. Turbulence is only prediction.
- The bigger issue is what they don't do

# GDP Growth

Real GDP Growth (YoY)

# Industrial Space

## Warehouse Space (Stock)

## Employment in Manufacturing and Logistics

# The Decline of Refining

### Contra Costa Refining Employment and Payrolls

## Berkeley Analysis

- Multipliers used are incorrect, overstating both job and tax revenue impacts
- Even right multipliers overstate, as much of the supply chain has already left the area
- Employment analysis: While there may be cases of dislocation, overall labor market very healthy. Existing support systems are capable of handling issues
- Historical precedent: Industry down by 50% last decade, 25% since 2019 with little aggregate impact

## Taxes and Gross vs Net Analysis

- It isn't what you lose, but what you transition to
- Core issues in Contra Costa is labor supply and building new local employment clusters

# Narratives of Fed Policy?

## The Federal Reserve's Narrative

- US inflation due to some exogenous shock

Yes this is what he said -

In light of the progress on inflation and the balance of risks, the Committee decided to lower the target range for the federal funds rate by 1/2 percentage point to 4-3/4 to 5 percent. In considering additional adjustments to the target range for the federal funds rate, the Committee will carefully assess incoming data, the evolving outlook, and the balance of risks. **The Committee will continue reducing its holdings of Treasury securities and agency debt and agency mortgage-backed securities.** The Committee is strongly committed to supporting maximum employment and returning inflation to its 2 percent objective.

some jobs / higher unemployment

## \$US: Real Broad Index

# Final Thoughts on Contra Costa

## Don't Look Back in Anger

- Community doing great, the economy not so much which is holding tax base down
- Region has moved from heavy industry to a bedroom community for the tech driven western bay economies
- Dutch disease preventing new job growth

## Employment Base Issues

- Recent gains in jobs mainly driven by household service spending
- Tech: staying in the west bay
- Heavy industry: moving on, bit by bit
- Household spending: moving to warehouses in Stockton, entertainment in Alameda, SF
- Back-Office operations moving to Sacramento

## Roofs, roofs, roofs

- Housing supply must grow faster than local housing demand
- Focus on entry-level, high-density housing
- Focus on employment opportunities that can make it in the East Bay: Back-office, household services, household entertainment
- Value add options on trade moving through area

## Obstacles to Success

- Core urban areas not building / densifying nearly enough—too much focus on jobs, not labor
- Wasted opportunities: Naval station, North shore waterfront, now refineries?
- Zoning for old economies, infrastructure investments needed

# Out of the Woods?

## *We were never in the woods.*

- Consumer demand remains strong
- Short run: the US expansion (4+ years old) will continue

## Headwinds will intensify

- Fed deficits and frothy asset markets, external imbalances growing
- Important #s: The \$US, HH savings rate, yield curve

## California: Focused on the wrong issues

- Housing supply, not affordability
- Dutch disease problems driven by a lack of labor

## The real issue?

- The narrative is running amuck
- Political chaos in its wake leaving US / CA policy rudderless
