From: Warren Lai, Public Works Director/Chief Engineer

Report Title: Adoption and levy of annual Drainage Area Benefit Assessment in DA 76A for Fiscal Year 2024-2025.
Project No. 7505-6F8167

Recommendation of the County Administrator Recommendation of Board Committee

RECOMMENDATIONS:

ADOPT Resolution adopting and levying the annual Drainage Area Benefit Assessment (DABA) in Drainage Area 76A (DA 76A) for Fiscal Year 2024-2025, Alamo area.

FISCAL IMPACT:

The proposed annual DABA will provide approximately \$44,135 in funding for flood control drainage maintenance activities in DA 76A. (100% Drainage Area Benefit Assessment Funds)

BACKGROUND:

A DABA is a subset of parcels within a defined boundary of a larger drainage area that is assessed to fund flood control infrastructure maintenance that directly benefits the area. Assessments are used to pay for flood control maintenance activities, including complaint investigation, facility inspections, ditch and basin cleaning, maintaining right-of-way access, and additional general or routine drainage maintenance activities. The assessments collected are used only for the maintenance and operation of the flood control facilities within the Contra Costa County Flood Control and Water Conservation District right-of-way limits.

DABAs are established when a development is determined to increase stormwater runoff, inundating existing drainage infrastructure. DABAs are established by agreement with developers or vote by parcel owners. DA 76A was established December 1, 1987, by adoption of Resolution No. 87/726 with subsequent annexations of additional developments in 1989, 1995, and 2000. DA 76A has been assigned a specific number of Impervious Area Units (IAUs), where a single IAU is equal to 1,000 square feet of impervious surface. Parcels within DA 76A are assigned a specific number of IAUs based upon their proportional share of impervious area in accordance with the Benefit Assessment Act of 1982. DA 76A has a total of 1,545 IAUs, where the typical single-family home may pay an assessment amount of \$89.42 for Fiscal Year 2024-2025.

To calculate the assessment, the cost of flood control infrastructure maintenance within DA 76A is budgeted. The cost of flood control infrastructure maintenance varies from year-to-year based upon the planned annual costs and unforeseen maintenance needs. The assessment rate/IAU is the quotient of the budgeted maintenance divided by the number of IAUs assigned to DA 76A. The assessment for each parcel is the product of the rate/IAU multiplied by the number of IAUs assigned to the parcel. At the onset of the initial formation, including subsequent annexation, a maximum assessment rate was adopted for the establishment of a reserve

fund based on unforeseen costs due to natural disasters or severe weather events. This maximum annual assessment remains unchanged and is not adjusted annually for inflation.

Based on the assessment calculation, where DA 75A has 1,545 IAUs and budgeted maintenance of \$46,100, the assessment rate for Fiscal Year 2024-2025 is calculated to be \$29.84. Unspent assessments from Fiscal Year 2023-2024 shall be carried over to Fiscal Year 2024-2025. As a result, the assessment rate that shall be levied will be less than the calculated rate of \$29.84.

CONSEQUENCE OF NEGATIVE ACTION:

If the proposed assessment for DA 76A is not adopted, the proposed assessment will not be levied, and the maintenance of the flood control facilities may not happen.

THE BOARD OF SUPERVISORS OF CONTRA COSTA COUNTY, CALIFORNIA
and for Special Districts, Agencies and Authorities Governed by the Board

IN THE MATTER OF ADOPTING AND LEVYING ASSESSMENTS IN DRAINAGE AREA 76A FOR FISCAL YEAR 2024-2025.

WHEREAS the Board of Supervisors FINDS that:

1. On December 1, 1987, the Board of Supervisors, as the governing body of the Contra Costa County Flood Control and Water Conservation District (Flood Control District), adopted Resolution No. 87/726, establishing Drainage Area 76A (DA 76A) and imposing assessments on parcels within the area of benefit pursuant to the Benefit Assessments Act of 1982 (Gov. Code, §54703 et. seq.), following approval by landowners, for the purpose of funding flood control facility maintenance, such as complaint investigation, facility inspections, ditch and basin cleaning, maintaining right-of-way access, and additional general or routine drainage maintenance activities.
2. Under Resolution No. 87/726, assessments were imposed based upon the annual budgeted cost of flood control facility maintenance for DA 76A, the total impervious surface area (described as Impervious Area Units [IAUs] where a single IAU is equal to 1,000 square feet of impervious surface area) assigned to DA 76A, and the number of IAUs attributable to each parcel. In this way, assessment amounts were determined on the basis of proportionate stormwater runoff from each parcel, in accordance with Government Code section 54711.
3. Under Resolution No. 87/726, and as approved by landowners of DA 76A, (a) the annual assessment rate is the quotient of the annual budgeted maintenance cost divided by the number of IAUs assigned to DA 76A; and (b) the maximum assessment amount is \$65.07/IAU.
4. As set forth in Exhibit A, attached hereto and incorporated by this reference, the maximum assessment rate for Fiscal Year 2023-2024 was \$65.07/IAU and remains unchanged for Fiscal Year 2024-2025.
5. As set forth in Exhibit A, for Fiscal Year 2024-2025, the budgeted maintenance to be funded by DA 76A assessments is \$46,100. Anticipated maintenance activities include facility inspections, ditch cleaning, fence repair, and landscape maintenance, among others.
6. Based upon the formula set forth in Resolution No. 87/726, the current number of IAUs in DA 76A (1,545), and budgeted maintenance of \$46,100, the adjusted annual assessment rate for Fiscal Year 2023-2024 would be \$29.84/IAU.
7. The annual assessment rate of \$29.84 is less than the maximum rate of \$65.07. The annual assessment rate for Fiscal Year 2024-2025 may, therefore, be set at \$29.84/IAU.
8. Unspent assessments from Fiscal Year 2023-2024 shall be carried over to Fiscal Year 2024-2025. As a result, the annual assessment rate that shall be levied will be less than the adjusted annual assessment rate of \$29.84.

NOW, THEREFORE, the Board hereby determines and resolves that:

1. The annual budgeted cost of flood control facility maintenance to be financed by DA 76A assessments for Fiscal Year 2024-2025 shall not exceed \$46,100.
2. Annual assessments shall be levied in DA 76A for Fiscal Year 2024-2025 at a rate of \$28.57/IAU, in the specific amounts shown per parcel on Exhibit B, attached hereto and incorporated herein by this reference.
3. The Drainage Area Benefit Assessment shall be collected in the same manner, and subject to the same penalties and priority of lien as other charges and taxes fixed and collected by, or on behalf of, the Flood Control District, pursuant to Government Code section 54718.
