The screenshot shows the top portion of the Family Caregiver Alliance website. At the top left is the FCA logo. To its right is the text 'Family Caregiver Alliance®'. Further right is a navigation bar with links in multiple languages: '資源' (Resources), '자원' (Resources), 'Recursos', 'Pagaaring yaman', and 'Tài nguyên'. To the right of these links is an orange 'Donate' button, a search icon, and a chat icon. Below the navigation bar are four main menu items: 'Connecting Caregivers', 'Caregiver Resources', 'Research & Policy', and 'About FCA'. The main content area features a large photograph of several people in a well-lit, wood-paneled room. In the foreground, a woman with glasses and a blue jacket is smiling and reaching out towards the camera. She has a name tag that says 'HELLO my name is Edith'. To her left, another woman in a plaid shirt is looking towards her. The background shows other people and large windows.

More Information About FCA

Family Caregiver Alliance offers education, services, research, and advocacy based on the real needs of family and informal caregivers. Founded in the late 1970s, FCA is the first community-based nonprofit organization in the United States to address the needs of families and friends providing long-term care for loved ones at home.

National Center on Caregiving (NCC) was established by FCA to advance the development of high-quality, cost effective programs and policies for caregivers in every state.

NCC sponsors Services by State, a state-by-state resource locator designed to help caregivers find support services in their communities.

Bay Area Caregiver Resource Center — operated by FCA for the six-county San Francisco Bay Area — provides support to family caregivers. FCA's staff of family consultants, through education programs and direct support, offer effective tools to manage the complex and demanding tasks of caregiving.

FCA CareNav is a secure online solution for quality information, support, and resources for family caregivers of adults with chronic physical or cognitive conditions such as Alzheimer's, stroke, Parkinson's, and other illnesses.
