Board of Retirement
Contra Costa County Employees' Retirement Association
1200 Concord Avenue, Suite 300
Concord, CA 94520

Dear Board Members:

We are pleased to submit this Actuarial Valuation and Review as of December 31, 2024 for the Contra Costa County Employees' Retirement Association ("CCCERA" or "the Plan" or "the Association"). It summarizes the actuarial data used in the valuation, analyzes the preceding year's experience, and establishes the funding requirements for fiscal year 2026-2027.

This report has been prepared in accordance with generally accepted actuarial principles and practices for the exclusive use and benefit of the Board of Retirement, based upon information provided by the staff of CCCERA.

Segal does not audit the data provided. The accuracy and comprehensiveness of the data is the responsibility of those supplying the data. To the extent we can, however, Segal does review the data for reasonableness and consistency. Based on our review of the data, we have no reason to doubt the substantial accuracy of the information on which we have based this report and we have no reason to believe there are facts or circumstances that would affect the validity of these results.

The measurements shown in this actuarial valuation may not be applicable for other purposes. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements; and changes in plan provisions or applicable law.

The actuarial calculations were directed under the supervision of Andy Yeung, ASA, MAAA, FCA and Enrolled Actuary. We are members of the American Academy of Actuaries and we meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein. To the best of our knowledge, the information supplied in this actuarial valuation is complete and accurate. The assumptions used in this actuarial valuation were selected by the Board of Retirement based upon our analysis and

recommendations. In our opinion, the assumptions are reasonable and take into account the experience of CCCERA and reasonable expectations. In addition, in our opinion, the combined effect of these assumptions is expected to have no significant bias.

Segal makes no representation or warranty as to the future status of the Plan and does not guarantee any particular result. This document does not constitute legal, tax, accounting or investment advice or create or imply a fiduciary relationship. The Board is encouraged to discuss any issues raised in this report with the Plan's legal, tax and other advisors before taking, or refraining from taking, any action.

We look forward to reviewing this report at your next meeting and to answering any questions.

Sincerely,

Segal

Section 1: Actuarial Valuation Summary

Purpose and basis

This report has been prepared by Segal to present a valuation of the Contra Costa County Employees' Retirement Association ("CCCERA" or "the Plan" or "the Association") as of December 31, 2024. The valuation was performed to determine whether the assets and contribution rates are sufficient to provide the prescribed benefits.

The contribution requirements presented in this report are based on:

- The benefit provisions of the Plan, as administered by the Board of Retirement;
- The characteristics of covered active members,¹ inactive members and retired members and beneficiaries as of December 31, 2024, provided by the Retirement Association;
- The assets of the Plan as of December 31, 2024, provided by the Retirement Association;
- Economic assumptions regarding future salary increases and investment earnings adopted by the Board of Retirement for the December 31, 2024 valuation;
- Other actuarial assumptions regarding employee terminations, retirement, death, etc. adopted by the Board of Retirement for the December 31, 2024 valuation; and
- The funding policy adopted by the Board of Retirement.

Certain disclosure information required by Governmental Accounting Standards Board (GASB) Statements No. 67 and 68 as of December 31, 2024 for the Plan is provided in a separate report.

One of the general goals of an actuarial valuation is to establish contributions which fully fund the Association's liabilities, and which, as a percentage of payroll, remain as level as possible for each generation of active members. Annual actuarial valuations measure the progress toward this goal, as well as test the adequacy of the contribution rates.

The contribution requirements are determined as a percentage of payroll. The Association's employer rates provide for both normal cost and a contribution to amortize any unfunded or overfunded actuarial accrued liabilities. In this valuation, we have applied the

¹ Similar to the disclosure we provided in our December 31, 2023 valuation report, the annual information for active members and, in particular, the service credit provided for active members was reported through November 30, 2024 instead of December 31, 2024. Based on prior discussions with CCCERA we understand that the Association is going to modify the data provided to Segal so as to report service through December 31. This change will first be reflected in the valuation following the modification in the data provided to Segal, and Segal will reflect the liability for that additional month of service at the same time.

Section 1: Actuarial Valuation Summary

funding policy adopted by the Board on February 26, 2014, updated on October 14, 2020 and September 13, 2023. Details of the funding policy are provided in *Section 4, Exhibit 1* starting on page 105.

The rates calculated in this report may be adopted by the Board of Retirement for the fiscal year that extends from July 1, 2026 through June 30, 2027.

Valuation highlights

Experience study and District consolidation

1. The results of this valuation reflect changes in the actuarial assumptions as recommended by Segal and adopted by the Board of Retirement for the December 31, 2024 valuation. These changes were documented in our January 1, 2021 through December 31, 2023 Actuarial Experience Study report dated April 30, 2025 and are also outlined in *Section 4, Exhibit 1* starting on page 105 of this report. These assumption changes resulted in a decrease in the average employer rate of 0.56% (which includes a decrease in normal cost rate of about 0.33% and a decrease in the UAAL rate of about 0.23% associated with a decrease in the UAAL by \$46.9 million). This decrease is mainly due to demographic assumption changes that reduce cost (such as higher termination rate, lower disability rate and new mortality tables that predict lower life expectancies for payees at advance ages) that is offset somewhat by the increase in the merit and promotion salary increases assumption.

There is an increase in the average member rate of 0.04% of payroll mainly due to the increase in the merit and promotion salary increases assumption. We note that the basic contribution rates for legacy members are not impacted by most of the demographic assumptions such as retirement rate, termination rate and disability rate. Therefore, the changes in those assumptions do not have an impact on the basic contribution rates for legacy members. Moreover, the reduction in the employer UAAL rate is also not shared by the members.

2. On April 9, 2025, Local Agency Formation Commissions (LAFCO) approved the annexation of Rodeo-Hercules Fire Protection District (RHFPD) into Contra Costa County Fire Protection District (CCCYPD) effective July 1, 2025. Prior to the consolidation, CCCYPD's and RHFPD's Safety members were in Cost Group 8 and Cost Group 12, respectively and they were the sole employer in each of those two cost groups. CCCYPD was the sole employer of the General members in Cost Group 5 while RHFPD's General members were a part of Cost Group 1, pooled with members from other employers in that Cost Group. After the annexation, RHFPD's Safety members became part of Cost Group 8 and RHFPD's General members became part of Cost Group 5.

The transfers of assets and liabilities associated with these Cost Group reassignments for RHFPD and CCCYPD members have been reflected in this valuation. Because RHFPD was the sole employer in Cost Group 12, the assets in Cost Group 12 have

Section 1: Actuarial Valuation Summary

been allocated to Cost Group 8. Because RHFPD's General members were part of Cost Group 1 and the unfunded actuarial accrued liability (the difference between the actuarial accrued liability and the valuation value of assets) contribution rate was pooled with other employers in Cost Group 1 and Cost Group 2, for their General members we have allocated to RHFPD a proportionate share of the UAAL based on their projected payroll to the total payroll for all employers in the two Cost Groups. These allocations were determined as of December 31, 2023 and the details of the allocations can be found in our June 24, 2025 letter.

As part of the consolidation, RHFPD made a prepayment of \$7.5 million on June 20, 2025 towards their December 31, 2023 UAAL for their Safety members now as part of Cost Group 8. As requested by CCCERA, this prepayment has been used to reduce RHFPD's UAAL contribution rates effective July 1, 2025 for their Safety members. While we have reflected the prepayment when we display their UAAL rates in the current (December 31, 2024) and the prior (December 31, 2023) valuation results, the first actuarial valuation to reflect the prepayment in the Table of Amortization Bases in Cost Group 8 will be as of December 31, 2025, as that will be the first valuation in which the prepayment will be reflected in the assets provided for the valuation.

Funding measures

3. The funded ratio (the ratio of valuation value of assets to the actuarial accrued liability) remains unchanged at 91.0% (after rounding). This ratio is one measure of funding status, and its history is a measure of funding progress. Using the market value of assets, the funded ratio increased from 86.8% to 89.4%. These measurements are not necessarily appropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the Plan's benefit obligation or the need for, or the amount of, future contributions. A history of the Association's funded ratios is provided in *Section 2, Subsection G* on pages 45 and 46.
4. The unfunded actuarial accrued liability (UAAL) increased from \$1.12 billion to \$1.17 billion. The increase in UAAL is primarily due to an investment return on the valuation value (after asset smoothing) less than the assumed rate of 6.75% and individual salary increases greater than expected by the assumptions used in the December 31, 2023 valuation, offset somewhat by the contributions made during the year to pay down the UAAL and changes in actuarial assumptions. A reconciliation of the Association's UAAL from the prior year is provided in *Section 2, Subsection E* on page 30.

A schedule of the current UAAL amortization balances and payments may be found in *Section 3, Exhibit H* starting on page 83. A graphical projection of the UAAL amortization balances and payments is provided in *Section 3, Exhibit I* starting on page 103.

Actuarial experience

5. The net actuarial loss of \$184.2 million, or 1.42% of actuarial accrued liability, is due to an investment loss (after asset smoothing) of \$154.2 million, or 1.19% of actuarial accrued liability, a contribution gain of \$61.7 million, or 0.48% of actuarial

Section 1: Actuarial Valuation Summary

accrued liability, and a net loss from sources other than investments and contributions of \$91.8 million, or 0.71% of the actuarial accrued liability, prior to reflection of the assumption changes. The loss from sources other than investments and contributions was primarily due to individual salary increases greater than expected. For more details, see the complete reconciliation of the Association's UAAL from the prior year in *Section 2, Subsection E* on page 30.

6. The rate of return on the market value of assets was 8.62% for the year ending December 31, 2024. The return on the valuation value of assets was 5.38% for the same period after recognizing a portion of this year's investment gain and a portion of prior years' investment gains and losses. This resulted in an actuarial loss when measured against the assumed rate of return of 6.75% used in the December 31, 2023 valuation. This actuarial investment loss (after asset smoothing) increased the average employer contribution rate by 0.94% of payroll.

Contributions

7. The average employer rate calculated in this valuation has decreased from 28.52% to 28.02% of payroll. This decrease is primarily due to amortizing the prior year's UAAL over a larger than projected total payroll and changes in actuarial assumptions, partially offset by the investment return on the valuation value (after asset smoothing) less than the assumed rate of 6.75% and individual salary increases greater than expected by the assumptions used in the December 31, 2023 valuation. A complete reconciliation of the Association's aggregate employer rate is provided in *Section 2, Subsection F* on page 33.

Separate employer contribution rates are shown for members with membership dates before January 1, 2013 (non-PEPRA or "legacy" members) and on or after January 1, 2013 (PEPRA members). However, the average employer contribution rates shown in *Section 1* are based on all members regardless of their membership date. A detailed schedule of the employer contribution rates is provided in *Section 2, Subsection F* starting on page 35.

A schedule with the recommended employer contribution rates that will be used in preparing the contribution rate packet is provided in *Appendix E* starting on page 186.

8. The average member rate calculated in this valuation has decreased from 12.13% to 12.04% of payroll. A complete reconciliation of the Association's aggregate member rate is provided in *Section 2, Subsection F* on page 34.

The detailed member rates by cost group are provided in *Section 4, Exhibit 3* starting on page 149.

9. Segal strongly recommends an actuarial funding method that targets 100% funding of the actuarial accrued liability. Generally, this implies payments that are ultimately at least enough to cover normal cost, interest on the UAAL and the principal balance. The funding policy adopted by the Board of Retirement meets this standard.
10. After we develop the total UAAL contribution rates for each cost group, we have to break down the total UAAL contribution rates between those required to amortize the shortfall in assets required to provide basic versus COLA benefits. While there are

Section 1: Actuarial Valuation Summary

definitive calculations of the actuarial accrued liabilities (AAL) based on the values of the basic versus COLA benefits for each cost group, we have to estimate to split the total assets between the amounts available to pay the basic versus COLA benefits. The method we have been using for CCCERA is as follows:

- a. calculate the ratio of the Association-wide reserves maintained to provide basic benefits to the Association-wide reserves maintained to provide total (basic plus COLA) benefits;
- b. apply the ratio calculated in a. for the entire Association to the total assets maintained for each cost group to get the basic assets for that cost group; and
- c. assign the remaining assets maintained for each cost group as COLA assets by subtracting the basic assets from the total assets for that cost group.

While the method described above is only used for allocation purposes between basic and COLA benefits once the total UAAL contribution rates have been calculated for all cost groups, the method tends to allocate more assets as COLA for the General cost groups and more assets as basic for the Safety cost groups. Before the next valuation, we could discuss with CCCERA whether it might be more desirable to allocate basic versus COLA assets based on the split of the basic versus COLA AAL for each cost group so that the UAAL contribution rates would be more proportional to the underlying AAL.

Future expectations

11. The total unrecognized net investment **loss** as of December 31, 2024 is \$212 million as compared to an unrecognized net investment **loss** of \$532 million in the previous valuation. This net deferred loss of \$212 million will be recognized in the determination of the actuarial value of assets for funding purposes in the next few years as shown in *Section 2, Subsection B* on page 23.

The net deferred loss of \$212 million represents about 1.8% of the market value of assets. Unless offset by future investment gains or other favorable experience, the recognition of the \$212 million net market loss is expected to have an impact on the Association's future funded ratio and contribution rate requirements. This potential impact may be illustrated as follows:

- a. If the net deferred loss was recognized immediately in the valuation value of assets, the funded percentage would decrease from 91.0% to 89.4%.
For comparison purposes, if the net deferred loss in the December 31, 2023 valuation had been recognized immediately in the December 31, 2023 valuation, the funded percentage would have decreased from 91.0% to 86.8%.
- b. If the net deferred loss was recognized immediately in the valuation value of assets, the average employer contribution rate would increase from 28.02% to 29.32% of payroll.

Section 1: Actuarial Valuation Summary

For comparison purposes, if the net deferred loss in the December 31, 2023 valuation had been recognized immediately in the December 31, 2023 valuation, the average employer contribution rate would have increased from 28.52% to 32.05% of payroll.

Risk

12. It is important to note that this actuarial valuation is based on plan assets as of December 31, 2024. The Plan's funded status does not reflect short-term fluctuations of the market, but rather is based on the market values on the last day of the plan year. Segal is available to prepare projections of potential outcomes of market conditions and other demographic experience upon request.
13. Because the actuarial valuation results are dependent on a given set of assumptions, there is a risk that emerging results may differ significantly as actual experience proves to be different from the assumptions. We have not been engaged to perform a detailed analysis of the potential range of the impact of risk relative to the Plan's future financial condition, we have included a brief discussion of some risks that may affect the Plan in *Section 2, Subsection I*, beginning on page 48. A more detailed assessment would provide the Board of Retirement with a better understanding of the inherent risks.
14. The risk assessment in *Section 2, Subsection I* includes the disclosure of a "Low-Default-Risk Obligation Measure" (LDROM). This disclosure, along with commentary on the significance of the LDROM, is a requirement under Actuarial Standard of Practice No. 4 (ASOP 4) for all pension funding actuarial valuation reports and can be found starting on page 50.

GASB

This report constitutes an actuarial valuation for the purpose of determining the actuarially determined contribution (ADC) under the Plan's funding policy and measuring the progress of that funding policy. The Net Pension Liability and Pension Expense under GASB Statements No. 67 and No. 68, for inclusion in the Plan's and employer's financial statements as of December 31, 2024, will be provided separately. The accounting disclosures will utilize different methodologies from those employed in the funding valuation, as required by the GASB. However, the ADC in this valuation is expected to be used as the ADC for GASB financial reporting.

Section 1: Actuarial Valuation Summary

Summary of key valuation results

Average Employer Contribution¹ Calculated as of December 31
(\$ in '000s)

Cost Group and Employer	2024 Total Rate	2024 Estimated Amount ²	2023 Total Rate	2023 Estimated Amount ²
General				
• Cost Group 1 – County and Small Districts (Tiers 1 and 4) ³	23.67%	\$5,748	24.03%	\$5,529
• Cost Group 2 – County and Small Districts (Tiers 3 and 5)	20.85%	191,495	21.41%	180,406
• Cost Group 3 – Central Contra Costa Sanitary District	18.98%	8,969	17.80%	7,504
• Cost Group 4 – Contra Costa Housing Authority	25.80%	2,122	27.50%	1,888
• Cost Group 5 – Contra Costa County Fire Protection District ³	36.93%	4,108	39.40%	3,714
• Cost Group 6 – Small Districts (Non-Enhanced Tiers 1 and 4)	15.32%	223	15.13%	203
Safety				
• Cost Group 7 – County (Tiers A and D)	60.17%	\$26,249	59.75%	\$27,563
• Cost Group 8 – Contra Costa County Fire Protection District ^{3,4}	61.20%	47,936	60.67%	44,681
• Cost Group 9 – County (Tiers C and E)	49.71%	42,970	49.46%	37,202
• Cost Group 10 – Moraga-Orinda Fire District	93.92%	8,669	91.22%	8,292
• Cost Group 11 – San Ramon Valley Fire District	49.05%	13,210	48.58%	12,440
All Cost Groups combined	28.02%	\$351,700	28.52%	\$329,423

Note: Pages 178 and 179 contain a summary that shows which employers are in each cost group.

¹ These rates **do not** include any employer subvention of member contributions or any member subvention of employer contributions.

² Based on projected compensation for each valuation date shown.

³ The rates as of December 31, 2023 and December 31, 2024 reflect the annexation of RHFPD into CCCFPD effective July 1, 2025.

⁴ The rates as of December 31, 2023 and December 31, 2024 reflect the prepayment made by RHFPD of \$7.5 million on June 20, 2025 towards the December 31, 2023 UAAL for their Safety members as part of the annexation of RHFPD into CCCFPD. This prepayment has been used to reduce the District's UAAL contribution rate effective July 1, 2025.

Section 1: Actuarial Valuation Summary

Average Member Contribution¹ Calculated as of December 31 (\$ in '000s)

All Cost Groups combined	12.04%	\$151,084	12.13%	\$140,154

Note: Pages 178 and 179 contain a summary that shows which employers are in each cost group.

¹ These rates **do not** include any employer subvention of member contributions or any member subvention of employer contributions.

² Based on projected compensation for each valuation date shown.

³ The rates as of December 31, 2023 are re-composited to reflect the annexation of RHFPD into CCCFPD.

Section 1: Actuarial Valuation Summary

Valuation Results as of December 31

Line Description	2024	2023
Actuarial accrued liability		
• Total actuarial accrued liability	\$12,982,890,011	\$12,438,710,062
– Retired members and beneficiaries	8,281,524,721	8,100,537,061
– Inactive members ¹	401,377,405	369,447,362
– Active members	4,299,987,885	3,968,725,639
• Normal cost for plan year beginning December 31 ²	332,435,691	314,351,763
Assets		
• Market value of assets (MVA)	\$11,620,426,442	\$10,808,858,259
• Actuarial value of assets (AVA)	11,832,779,196	11,340,825,456
• Actuarial value of assets as a percentage of market value of assets	101.8%	104.9%
• Valuation value of assets (VVA)	\$11,815,241,998	\$11,323,476,654
Funded status		
• Unfunded Actuarial Accrued Liability on MVA basis ³	\$1,380,000,767	\$1,647,200,605
• Funded percentage on MVA basis ³	89.4%	86.8%
• Unfunded Actuarial Accrued Liability on VVA basis	\$1,167,648,013	\$1,115,233,408
• Funded percentage on VVA basis	91.0%	91.0%
Key assumptions		
• Net investment return	6.75%	6.75%
• Inflation rate	2.50%	2.50%
• Payroll growth	3.00%	3.00%
• Cost-of-living adjustments		
– Tiers with 3%/4% COLA	2.75%	2.75%
– Tiers with 2% COLA	2.00%	2.00%

¹ Includes inactive members with member contributions on deposit.

² Includes administrative expenses. The normal cost as of December 31, 2023 and December 31, 2024 reflect the annexation of RHFPD into CCCFPD effective July 1, 2025.

³ Both the UAAL and the funded percentage on MVA basis have been calculated by using the MVA reduced by non-valuation reserves in the amount of \$17,537,198 as of 2024 and \$17,348,802 as of 2023.

Section 1: Actuarial Valuation Summary

Demographic Data as of December 31

Demographic Data by Status	2024	2023	Change
Active members			
• Number of members	10,791	10,349	4.3%
• Average age	45.9	46.1	(0.2)

• Number of members ¹	4,188	4,109	1.9%
• Average age	46.9	46.5	0.4
Total members	25,946	25,263	2.7%

¹ Includes 2,335 inactive non-vested members due a refund of member contributions as of 2024 and 1,987 as of 2023.

Section 1: Actuarial Valuation Summary

Important information about actuarial valuations

An actuarial valuation is a budgeting tool with respect to the financing of future projected obligations of a pension plan. It is an estimated forecast – the actual long-term cost of the plan will be determined by the actual benefits and expenses paid and the actual investment experience of the plan.

In order to prepare a valuation, Segal relies on a number of input items. These include:

Input Item	Description
Plan provisions	Plan provisions define the rules that will be used to determine benefit payments, and those rules, or the interpretation of them, may change over time. Even where they appear precise, outside factors may change how they operate. It is important to keep Segal informed with respect to plan provisions and administrative procedures, and to review the plan summary included in our report to confirm that Segal has correctly interpreted the plan of benefits.
Member information	An actuarial valuation for a plan is based on data provided to the actuary by the Association. Segal does not audit such data for completeness or accuracy, other than reviewing it for obvious inconsistencies compared to prior data and other information that appears unreasonable. It is important for Segal to receive the best possible data and to be informed about any known incomplete or inaccurate data.
Financial information	Part of the cost of a plan will be paid from existing assets — the balance will need to come from future contributions and investment income. The valuation is based on the asset values as of the valuation date, typically reported by the Association. A snapshot as of a single date may not be an appropriate value for determining a single year's contribution requirement, especially in volatile markets. Plan sponsors often use an "actuarial value of assets" that differs from market value to gradually reflect year-to-year changes in the market value of assets in determining the contribution requirements.
Actuarial assumptions	In preparing an actuarial valuation, Segal starts by developing a forecast of the benefits to be paid to existing plan members for the rest of their lives and the lives of their beneficiaries. This requires actuarial assumptions as to the probability of death, disability, withdrawal, and retirement of members in each year, as well as forecasts of the plan's benefits for each of those events. In addition, the benefits forecasted for each of those events in each future year reflect actuarial assumptions as to salary increases and cost-of-living adjustments (if applicable). The forecasted benefits are then discounted to a present value, typically based on an estimate of the rate of return that will be achieved on the plan's assets. All of these factors are uncertain and unknowable. Thus, there will be a range of reasonable assumptions, and the results may vary materially based on which assumptions are selected within that range. That is, there is no right answer (except with hindsight). It is important for any user of an actuarial valuation to understand and accept this constraint. The actuarial model may use approximations and estimates that will have an immaterial impact on our results. In addition, the actuarial assumptions may change over time, and while this can have a significant impact on the reported results, it does not mean that the previous assumptions or results were unreasonable or wrong.

Section 1: Actuarial Valuation Summary

The user of Segal's actuarial valuation (or other actuarial calculations) should keep the following in mind:

- The actuarial valuation is prepared at the request of the Association. Segal is not responsible for the use or misuse of its report, particularly by any other party.
- An actuarial valuation is a measurement at a specific date — it is not a prediction of a plan's future financial condition. Accordingly, Segal did not perform an analysis of the potential range of financial measurements, except where otherwise noted.
- If CCCERA is aware of any event or trend that was not considered in this valuation that may materially change the results of the valuation, Segal should be advised, so that we can evaluate it.
- Segal does not provide investment, legal, accounting or tax advice and is not acting as a fiduciary to the Plan. This valuation is based on Segal's understanding of applicable guidance in these areas and of the Plan's provisions, but they may be subject to alternative interpretations. The Association should look to their other advisors for expertise in these areas.
- While Segal maintains extensive quality assurance procedures, an actuarial valuation involves complex computer models and numerous inputs. In the event that an inaccuracy is discovered after presentation of Segal's valuation, Segal may revise that valuation or make an appropriate adjustment in the next valuation.
- Segal's report shall be deemed to be final and accepted by CCCERA upon delivery and review. CCCERA should notify Segal immediately of any questions or concerns about the final content.

Section 2: Actuarial Valuation Results

A. Member information

The Actuarial Valuation and Review considers the number and demographic characteristics of covered members, including active members, inactive members, retired members and beneficiaries.

This section presents a summary of significant statistical data on these member groups. More detailed information for this valuation year and the preceding valuation can be found in *Section 3, Exhibits A, B, and C*.

Member Population

As of December 31	Active Members	Inactive Members ¹	Retired Members & Beneficiaries (Pay Status)	Total Non-Actives	Ratio of Non-Actives to Actives	Ratio of Pay Status to Actives
2015	9,642	2,790	9,068	11,858	1.23	0.94
2016	9,848	3,089	9,100	12,189	1.24	0.92

Section 2: Actuarial Valuation Results

B. Financial information

Retirement plan funding anticipates that, over the long term, both contributions and investment earnings (less investment fees) will be needed to cover benefit payments and administrative expenses. Retirement plan assets change as a result of the net impact of these income and expense components.

Additional financial information, including a summary of transactions for the valuation year, is presented in *Section 3, Exhibits D through G*.

It is desirable to have level and predictable plan costs from one year to the next. For this reason, the Board has approved an asset valuation method that gradually adjusts to market value. Under this valuation method, the full value of market fluctuations is not recognized in a single year and, as a result, the valuation asset value and the plan costs are more stable. The amount of the adjustment to recognize market value is treated as income, which may be positive or negative. Realized and unrealized gains and losses are treated equally and, therefore, the sale of assets has no immediate effect on the actuarial value.

Comparison of Contributions Made with Benefits and Expenses¹ for Years Ended December 31

¹ Prior to 2016, administrative expenses were included as an offset to investment income and are not shown in the graph. Starting in 2016, the employer and member contributions shown in the graph include an administrative expense load.

Section 2: Actuarial Valuation Results

Determination of Actuarial Value and Valuation Value of Assets for Year Ended December 31, 2024

¹ Total deferred return is equal to the **sum of 2a through 2k**. The total deferred return as of December 31, 2024 is recognized in each of the next five years as follows:

a. Amount recognized on December 31, 2025	\$(93,710,382)
b. Amount recognized on December 31, 2026	(193,690,853)
c. Amount recognized on December 31, 2027	37,931,566
d. Amount recognized on December 31, 2028	37,555,118
e. Amount recognized on December 31, 2029	(438,203)

Section 2: Actuarial Valuation Results

Asset history

The market value, actuarial value and valuation value of assets are representations of the Plan's financial status. As investment gains and losses are gradually taken into account, the actuarial value of assets tracks the market value of assets. The valuation value of assets is generally the actuarial value, excluding any non-valuation reserves.

The valuation value of assets is significant because the Plan's liabilities are compared to these assets to determine what portion, if any, remains unfunded. Amortization of the unfunded actuarial accrued liability is an important element in determining the contribution requirement.

Market Value, Actuarial¹ Value, and Valuation Value of Assets as of December 31

¹ The actuarial value and the valuation value have been substantially the same over the time period shown, differing by no more than \$20 million.

Most recent 15-year geometric average return	7.36%	6.26%	6.26%

Section 2: Actuarial Valuation Results

C. Actuarial experience

To calculate any actuarially determined contribution, assumptions are made about future events that affect the amount and timing of benefits to be paid and assets to be accumulated. Each year actual experience is measured against the assumptions. If overall experience is more favorable than anticipated (an actuarial gain), the actuarially determined contribution will decrease from the previous year. On the other hand, the actuarially determined contribution will increase if overall actuarial experience is less favorable than expected (an actuarial loss).

Taking account of experience gains or losses in one year without making a change in assumptions reflects the belief that the single year's experience was a short-term development and that, over the long term, experience will return to the original assumptions. For contribution requirements to remain stable, assumptions should approximate experience.

If assumptions are changed, the contribution requirement is adjusted to take into account a change in experience anticipated for all future years. There are changes in actuarial assumptions reflected in this valuation.

The actuarial experience for the year can be found below and a discussion of the major components can be found on the following pages.

Actuarial Experience for Year Ended December 31, 2024

Source	Amount
1. Net (gain)/loss from investments ¹	\$154,151,887
2. Net (gain)/loss from contribution experience ²	(61,731,945)
3. Net (gain)/loss from other experience ³	91,787,394
4. Net experience (gain)/loss	\$184,207,336

¹ Details on next page.

² See *Section 2, Subsection E* for further details.

³ See *Section 2, Subsection E* for further details. Does not include the effect of plan or assumption changes, if any.

Section 2: Actuarial Valuation Results

Investment experience

A major component of projected asset growth is the assumed rate of return. The assumed return should represent the expected long-term rate of return, based on the Plan's investment policy.

For valuation purposes, the assumed rate of return on the valuation value of assets is 6.75% based on the December 31, 2023 valuation. The actual rate of return on a valuation basis for the 2024 plan year was 5.38% after recognizing a portion of this year's investment gains and a portion of prior years' investment gains and losses. Since the actual return for the year was less than the assumed return, the Plan experienced an actuarial loss during the year ended December 31, 2024 with regard to its investments.

Investment Experience for Year Ended December 31, 2024

Line Description	Market Value	Actuarial Value	Valuation Value
1. Net investment income	\$927,051,751	\$607,437,308	\$606,314,162
2. Average value of assets	10,751,077,921	11,283,045,118	11,266,163,691
3. Rate of return: $1 \div 2$	8.62%	5.38%	5.38%
4. Assumed rate of return	6.75%	6.75%	6.75%
5. Expected investment income: ¹ 2×4	725,697,760	761,605,545	760,466,049
6. Investment gain/(loss): $1 - 5$	\$201,353,991	\$(154,168,237)	\$(154,151,887)

¹ The expected investment returns are based on January 1, 2024 asset values and, with the exception of special contributions, do not take into account the actual timing of cashflows during the year. Instead, normal contributions, benefit payments and expenses are assumed to occur in the middle of the year.

Section 2: Actuarial Valuation Results

Contributions

Contributions (excluding additional UAAL contributions) for the year ended December 31, 2024 totaled \$530.1 million, compared to the projected amount of \$470.4 million. This resulted in a gain of \$61.7 million for the year, when adjusted for timing.

Other experience

There are other differences between the expected and the actual experience that appear when the new valuation is compared with the projections from the previous valuation. These include:

- Mortality experience (more or fewer than expected deaths)
- The extent of turnover among members
- Retirement experience (earlier or later than projected)
- The number of disability retirements (more or fewer than projected)
- Salary increases (greater or smaller than projected)
- Cost-of-living adjustments (COLAs) (higher or lower than assumed)
- Administrative expenses (higher or lower than assumed)

The net loss from this other experience for the year ended December 31, 2024 amounted to \$91.8 million, which is 0.7% of the actuarial accrued liability. See *Section 2, Subsection E* for a detailed development of the unfunded actuarial accrued liability.

Section 2: Actuarial Valuation Results

D. Other changes impacting the actuarial accrued liability

Actuarial assumptions

- The results of this valuation reflect changes in the actuarial assumptions as recommended by Segal and adopted by the Board of Retirement for the December 31, 2024 valuation. These assumption changes, including higher termination rate, lower disability rate and new mortality tables that predict lower life expectancies for payees at advance ages, resulted in a decrease in UAAL by \$46.9 million and a reduction in the employer's UAAL rate by 0.23% of payroll.

Details on actuarial assumptions and methods are in *Section 4, Exhibit 1*.

Plan provisions

There were no changes in plan provisions since the prior valuation.

A summary of plan provisions is in *Section 4, Exhibit 2*.

Section 2: Actuarial Valuation Results

E. Unfunded actuarial accrued liability

Reconciliation of Unfunded Actuarial Accrued Liability

Line Description	Amount
1. Unfunded actuarial accrued liability as of December 31, 2023	\$1,115,233,408
2. Normal cost ¹ at middle of year	302,350,044
3. Expected administrative expenses	13,527,810
4. Expected employer and member contributions	(470,384,468)
5. Interest to end of year	69,616,273
6. Expected unfunded actuarial accrued liability as of December 31, 2024	\$1,030,343,067
7. Changes due to:	
a. Investment return lower than expected, after asset smoothing	\$154,151,887
b. Actual contributions greater than expected under funding policy ²	(61,731,945)
c. Individual salary increases greater than expected	75,526,147
d. COLA increases lower than expected for April 1, 2025 ³	(12,035,062)
e. Other net experience loss ⁴	28,296,309
f. Changes in actuarial assumptions	(46,902,390)
g. Total changes	\$137,304,946
8. Unfunded actuarial accrued liability as of December 31, 2024: 6 + 7g	\$1,167,648,013

Note: The sum of items 7c through 7e equals the “Net (gain)/loss from other experience” shown in *Section 2, Subsection C*.

¹ Excludes administrative expense load.

² The actual employer contributions were greater than expected due to the scheduled 18-month lag in implementing the lower contribution rates calculated in the December 31, 2023 valuation for Fiscal Year 2025-2026, as well as actual covered payroll for 2024 being greater than the projected compensation in the December 31, 2023 valuation.

³ For tiers with a maximum 3% or 4% COLA, the actual COLA increase on April 1, 2025 is 2.5% for those retirees without a COLA bank versus 2.75% assumed in the last valuation.

⁴ Includes other differences in actual versus expected experience including (but not limited to) mortality, retirement, disability, termination and leave cashout experience.

Section 2: Actuarial Valuation Results

F. Recommended contribution

The recommended contribution is equal to the employer normal cost payment and a payment on the unfunded actuarial accrued liability. As of December 31, 2024, the average recommended employer contribution is 28.02% of payroll.

The Board sets the funding policy used to calculate the recommended contribution based on layered 18-year¹ amortization periods as a level percentage of payroll. See *Section 4, Exhibit 1* for further details on the funding policy. Based on this policy, there is no negative amortization and each amortization layer is fully funded in 18 years. As shown in the graphical projection of the UAAL amortization balances and payments found in *Section 3, Exhibit I*, before taking into consideration the deferred investment gains and/or losses that will be recognized in the next several valuations, the UAAL of the Plan is expected to be fully amortized by 2042,² assuming all assumptions are realized and contributions are made in accordance with the funding policy.

The current funding policy is intended to fully fund the cost of the benefits and to allocate the cost of benefits reasonably and equitably over time while minimizing the volatility of employer contributions. The recommended contribution is expected to remain level as a percent of payroll, except when any current amortization layer is fully amortized and assuming there are no future actuarial gains or losses. Furthermore, the funded ratio is expected to increase as the UAAL is methodically funded by employer contributions.

¹ Changes in UAAL due to actuarial gains or losses and changes in actuarial assumptions or methods for each valuation are amortized over separate 18-year periods, while changes in UAAL due to plan amendments are amortized over separate 10-year periods.

² Excludes withdrawn employers.

Section 2: Actuarial Valuation Results

Average Recommended Employer Contribution Calculated as of December 31

Line Description	2024 Amount (\$ in '000s)	2024 % of Projected Compensation	2023 Amount (\$ in '000s)	2023 % of Projected Compensation
1. Total normal cost ¹	\$332,436	26.49%	\$314,376	27.21% ^{2,3}
2. Expected member contributions ¹	151,084	12.04%	140,154	12.13% ^{2,3}
3. Employer normal cost: ¹ 1 – 2	\$181,352	14.45%	\$174,222	15.08% ^{2,3}
4. Actuarial accrued liability	12,982,890		12,438,710	
5. Valuation value of assets	11,815,242		11,323,477	
6. Unfunded actuarial accrued liability: 4 – 5	\$1,167,648		\$1,115,233	
7. Payment on UAAL	170,348	13.57% ⁴	155,201	13.44% ^{2,4}
8. Average recommended employer contribution: 3 + 7	\$351,700	28.02%	\$329,423	28.52%
9. Projected compensation	\$1,255,279		\$1,155,130	

Note: Contributions are assumed to be paid at the middle of the year.

¹ Includes administrative expense load.

² Reflects the annexation of RHFPD into CCCFPD that was effective July 1, 2025.

³ Reflects RHFPD Safety legacy active members receiving Safety Tier A Enhanced benefit for future service only, as part of the annexation of RHFPD into CCCFPD effective July 1, 2025.

⁴ Reflects UAAL prepayment of \$7.5 million made by RHFPD on June 20, 2025 for their Safety members.

Section 2: Actuarial Valuation Results

Line Description	Contribution Rate ¹	Estimated Amount ²
1. Average recommended employer contribution as of December 31, 2023 – after annexation ³	28.52%	\$329,422,549
2. Changes due to:		
a. Investment return less than expected after asset smoothing	0.94%	11,799,623
b. Actual contributions greater than expected under funding policy ⁴	(0.35%)	(4,393,477)
c. Individual salary increases greater than expected	0.46%	5,774,284
d. Amortizing prior year's UAAL over a larger than expected total payroll	(0.75%)	(9,414,593)
e. COLA increases lower than expected for April 1, 2025 ⁵	(0.07%)	(878,695)
f. Change in active member demographics on normal cost ⁶	(0.31%)	(3,891,365)
g. Other net experience gain ⁷	0.14%	30,310,876
h. Changes in actuarial assumptions	(0.56%)	(7,029,563)
i. Total change	(0.50%)	\$22,277,090
3. Average recommended employer contribution as of December 31, 2024⁸: 1 + 2i	28.02%	\$351,699,639

¹ These rates **do not** include any employer subvention of member contributions, or member subvention of employer contributions.

² Based on projected compensation for each valuation date shown.

³ The contribution rate and dollar amount shown as of December 31, 2023 has been recalculated since the prior valuation to reflect the annexation of RHFPD into CCCFPD effective July 1, 2025. It also reflects the UAAL prepayment made by RHFPD in the amount of \$7.5 million on June 20, 2025.

⁴ The actual employer contributions were greater than expected due to the scheduled 18-month lag in implementing the lower contribution rates calculated in the December 31, 2023 valuation for Fiscal Year 2025-2026, as well as actual covered payroll for 2024 being greater than the projected compensation in the December 31, 2023 valuation.

⁵ For tiers with a maximum 3% or 4% COLA, the actual COLA increase on April 1, 2025 is 2.5% for those retirees without a COLA bank versus 2.75% assumed in the last valuation.

⁶ This is the net impact of: a) reduction in normal cost rate due to the replacement of legacy members by PEPRA members, b) change in entry age and other demographic profiles, and c) the effect of legacy Safety members who for the first time reached 30 years of reported service as of December 31, 2024 and stopped making member basic contributions.

⁷ Includes other differences in actual versus expected experience including (but not limited to) mortality, retirement, disability, termination and leave cashout experience. Estimated amount also reflects changes in payroll from prior valuation.

⁸ The contribution rate and annual dollar amount shown as of December 31, 2024 has been calculated to reflect the UAAL prepayment made by RHFPD in the amount of \$7.5 million on June 20, 2025.

Section 2: Actuarial Valuation Results

Reconciliation of Average Recommended Member Contribution Rate

Line Description	Contribution Rate ¹	Estimated Amount ²
1. Average recommended member contribution as of December 31, 2023 – after annexation ³	12.13%	\$140,154,053
2. Changes due to:		
a. Change in administrative expense load ⁴	0.01%	\$125,528
b. Change in active member demographics ⁵	(0.14%)	10,302,552
c. Changes in actuarial assumptions	0.04%	502,112
d. Total change	(0.09%)	\$10,930,192
3. Average recommended member contribution as of December 31, 2024: 1 + 2d	12.04%	\$151,084,245

¹ These rates **do not** include any employer subvention of member contributions, or member subvention of employer contributions.

² Based on projected compensation for each valuation date shown.

³ The contribution rate and dollar amount shown as of December 31, 2023 has been recalculated since the prior valuation to reflect the annexation of RHFPD into CCCFPD effective July 1, 2025.

⁴ The calculation and the allocation of the administrative expense between employer and member can be found on page 107.

⁵ This is the net impact of: a) reduction in normal cost rate due to the replacement of legacy members by PEPRA members, b) change in entry age and other demographic profiles, and c) the effect of legacy Safety members who for the first time reached 30 years of reported service as of December 31, 2024 and stopped making member basic contributions. Estimated amount also reflects changes in payroll from prior valuation.

Total Contribution	18.44%	2.52%	20.96%	\$44,350	18.10%	2.93%	21.03%	\$42,434
Tier 4 (3% COLA) — Non-LAFCO								
Normal Cost	9.45%	3.10%	12.55%	\$1,349,083	9.59%	3.22%	12.81%	\$1,182,304
UAAL	9.99%	(1.08%)	8.91%	957,795	9.60%	(0.75%)	8.85%	816,813
Total Contribution	19.44%	2.02%	21.46%	\$2,306,878	19.19%	2.47%	21.66%	\$1,999,117
Tier 4 (3% COLA) — LAFCO³								
Normal Cost	9.45%	3.10%	12.55%	\$10,415	9.59%	3.22%	12.81%	\$10,046
UAAL	5.39%	(1.08%)	4.31%	3,577	4.90%	(0.75%)	4.15%	3,255
Total Contribution	14.84%	2.02%	16.86%	\$13,992	14.49%	2.47%	16.96%	\$13,301
Tier 4 (2% COLA)								
Normal Cost	8.98%	2.03%	11.01%	\$0	9.09%	2.09%	11.18%	\$0
UAAL	9.99%	(1.08%)	8.91%	0	9.60%	(0.75%)	8.85%	0
Total Contribution	18.97%	0.95%	19.92%	\$0	18.69%	1.34%	20.03%	\$0

¹ The Basic normal cost and UAAL rates shown for each tier include an explicit administrative expense load of 0.53% and 0.12% of payroll, respectively for 2024 and 0.52% and 0.13% of payroll, respectively for 2023.

² The COLA rate in the December 31, 2024 valuation has become negative as a result of amortizing the bases established as of December 31, 2012 through December 31, 2018 over six years. While this does not impact the total recommended rate, we are available to discuss various options should CCCERA prefer not to have a negative COLA rate.

³ The annual dollar contribution amount shown for "Tier 4 (3% COLA) — Non-LAFCO" has been revised since the prior valuation to reflect the reduction in payroll due to the annexation of RHFPD into CCCFPD that was effective July 1, 2025.

⁴ LAFCO has made several UAAL prepayments in recent years. Those prepayments have been amortized over 18 years from the date they were made and allocated to provide Basic UAAL rate credits.

The contribution rates and the annual dollar contribution amounts shown for Cost Group 8 are after reflecting the annexation of RHFPD into CCCFPD that was effective July 1, 2025. We have also reflected the \$7.5 million prepayment made by RHFPD on June 20, 2025 for the Safety group.

² The increase in UAAL rate for 2024 is primarily due to investment return less than expected after asset smoothing and mortality loss, offset by other actuarial gains/losses.

Section 2: Actuarial Valuation Results

G. Funded status

A commonly reported piece of information regarding the Plan's financial status is the funded ratio. These ratios compare the market, actuarial and valuation value of assets to the actuarial accrued liability of the Plan. Higher ratios indicate a relatively well-funded plan while lower ratios may indicate recent changes to actuarial assumptions, funding of the plan below actuarial requirements, poor asset performance, or a variety of other causes.

The funded status measures shown in this valuation are appropriate for assessing the need for or amount of future contributions. However, they are not necessarily appropriate for assessing the sufficiency of Plan assets to cover the estimated cost of settling the Plan's benefit obligations. As the chart below shows, the measures are different depending on whether the market, actuarial, or valuation value of assets is used.

Funded Ratio as of December 31

Note: The actuarial value of assets and the valuation value of assets have been substantially the same over the time period shown, differing by no more than \$20 million.

Section 2: Actuarial Valuation Results

Schedule of Funding Progress

As of December 31	Valuation Value of Assets ¹ (a)	Actuarial Accrued Liability (AAL) ² (b)	Unfunded AAL (UAAL) (b) – (a)	Funded Ratio (a) ÷ (b)	Projected Compensation (c)	UAAL as a % of Projected Compensation [(b) – (a)] ÷ (c)
2015	\$7,136,801,380	\$8,448,624,096	\$1,311,822,716	84.5%	\$746,352,663	175.8%
2016	7,606,997,530	8,794,434,139	1,187,436,609	86.5%	784,412,260	151.4%
2017	8,179,891,191	9,239,246,920	1,059,355,729	88.5%	860,624,613	123.1%

2024	11,815,241,998	12,982,890,011	1,167,648,013	91.0%	1,255,279,090	93.0%

¹ Excludes assets for non-valuation reserves.

² Excludes liabilities for non-valuation reserves.

Section 2: Actuarial Valuation Results

H. Actuarial balance sheet

An overview of the Plan's funding is given by an actuarial balance sheet. In this approach, first the amount and timing of all future payments that will be made by the Plan for current members is determined. Then these payments are discounted at the valuation interest rate to the date of the valuation, thereby determining the present value, referred to as the "liability" of the Plan.

Second, this liability is compared to the assets. The "assets" for this purpose include the net amount of assets already accumulated by the Plan, the present value of future member contributions, the present value of future employer normal cost contributions, and the present value of future employer amortization payments for the unfunded actuarial accrued liability.

Actuarial Balance Sheet as of December 31, 2024

Line Description	Basic	COLA	Total
Liabilities			
Present value of benefits for retired members and beneficiaries	\$4,530,842,842	\$3,750,681,879	\$8,281,524,721
Present value of benefits for inactive members ¹	304,457,339	96,920,066	401,377,405
Present value of benefits for active members	5,042,421,639	1,699,847,647	6,742,269,286
Total liabilities	\$9,877,721,820	\$5,547,449,592	\$15,425,171,412
Current and Future Assets			
Total valuation value of assets	\$7,267,885,728	\$4,547,356,270	\$11,815,241,998
Present value of future contributions by members	935,594,162	309,273,647	1,244,867,809
Present value of future employer contributions for:			
• Entry age normal cost	920,810,408	276,603,184	1,197,413,592
• Unfunded actuarial accrued liability	753,431,522	414,216,491	1,167,648,013
Total current and future assets	\$9,877,721,820	\$5,547,449,592	\$15,425,171,412

¹ Includes inactive members with member contributions on deposit.

Section 2: Actuarial Valuation Results

I. Risk

Because the actuarial valuation results are dependent on a fixed set of assumptions and data as of a specific date, there is risk that emerging results may differ, perhaps significantly, as actual experience is fluid and will not exactly track current assumptions. This potential divergence may have a significant impact on the future financial condition of the plan.

This report does not contain a detailed analysis of the potential range of future measurements, but does include a concise discussion of some of the primary risks that may affect the Plan's future financial condition. We recommend a more detailed assessment of the risks to provide the Board with a better understanding of the risks inherent in the Plan that can inform both financial preparation and future decision making. This assessment would enable us to work with the Board to highlight and illustrate particular risks or potential future outcomes they may be interested in discussing and could include scenario testing, sensitivity testing, stress testing and stochastic modeling.

This section provides descriptions and basic assessments of the primary risks that are likely to have an ongoing influence on the Plan's financial health, as well as a discussion of historical trends and maturity measures:

Risk assessments

- **Asset/Liability Mismatch Risk** (the potential that future plan experience does not affect asset and liability values in the same way, causing them to diverge)

The most significant asset/liability mismatch risk to the Plan is investment risk, as discussed below. In fact, investment risk has the potential to impact asset/liability mismatch in two ways. The first is evident in annual valuations; when asset values deviate from assumptions they are typically independent from liability changes. The second can be caused when systemic asset deviations from assumptions may signal the need for an assumption change, which causes liability values and contribution rates to move in the opposite direction from any change in the expected experience of asset growth rates.

Asset/liability mismatch can also be caused by demographic assumption risk such as longevity, which affects liabilities but has no impact on asset levels. This risk is also discussed below.

- **Investment Risk** (the risk that investment returns will be different than expected)

The investment return assumption is a long-term, static assumption for valuation purposes even though in reality market experience can be quite volatile in any given year. That volatility can cause significant changes in the financial condition of the Plan, affecting both funded status and contribution rates. The inherent year-to-year volatility is reduced by smoothing through the valuation value of assets, however investment experience can still have a sizable impact. As discussed in *Section 2, Subsection J, Volatility Ratios*, on page 52, a 1% asset gain or loss (relative to the assumed investment return) translates to about 9.2% of one-

Section 2: Actuarial Valuation Results

year's payroll. Since actuarial gains and losses are amortized over 18 years, there would be a 0.7% of payroll decrease/(increase) in the required contribution for each 1% asset gain/(loss).

The year-by-year market value rate of return over the last 10 years has ranged from a low of -11.25% to a high of 14.39%.

- **Longevity Risk** (the risk that mortality experience will be different than expected)

The actuarial valuation includes current life expectancy assumptions and an expectation of future improvement in life expectancy, which are significant assumptions given the relatively long duration of liabilities for pension plans. Emerging plan experience that does not match these expectations will result in increases or decreases in the actuarially determined contribution over time. This risk can be reduced by using tables appropriate for the Plan (public experience tables) that are weighted by benefit levels, and by using generational mortality projections. The Board has adopted mortality tables based on this methodology.

- **Other Risks**

In addition to longevity, the valuation includes a variety of other assumptions that are unlikely to match future experience exactly. One example is projected salary scales over time. As salary is central to the determination of benefits paid in retirement, deviations from the projected salary scales could have a material impact on the benefits anticipated for each member. Examples of other demographic assumptions include retirement, termination and disability assumptions, and will likely vary in significance for different groups (for example, disability assumptions are typically more significant for Safety groups).

Some plans also carry significant contribution risk, defined as the potential for actual future contributions deviating from expected future contributions. However, the employers have a proven track-record of making the actuarially determined contributions based on the Board's Actuarial Funding Policy, so contribution risk is minimal.

Evaluation of historical trends

Past experience can help demonstrate the sensitivity of key results to the Plan's actual experience. Over the past ten years:

- The funded percentage on the valuation value of assets basis has increased from 84.5% to 91.0%. This is primarily due to contributions made to amortize the UAAL (i.e., amortizing each layer of UAAL over 18 years as a level percentage of pay). For a more detailed history see *Section 2, Subsection G, Funded status* starting on page 45.
- The average geometric investment return on the valuation value of assets over the last 10 years was 6.71%. This includes a high of 8.79% and a low of 5.25%. The average over the last five years is 6.15%. For more details see *Historical investment returns* in *Section 2, Subsection B*, on page 25.
- Beyond investment experience, the primary source of new UAAL was the strengthening of assumptions through multiple assumption changes. In particular, the assumption changes in 2015 changed the discount rate from 7.25% to 7.00% (as well as

Section 2: Actuarial Valuation Results

various other changes) adding \$114 million in unfunded liability. The assumption changes in 2021 changed the discount rate from 7.00% to 6.75% (as well as various other changes) adding \$235 million in unfunded liability. The assumption changes in 2024 updated the mortality tables and reduced the unfunded liability by \$47 million. For more details on unfunded liability changes see *Section 3, Exhibit H, Table of amortization bases* starting on page 83.

- The plan's funding policy effectively deals with these unfunded liabilities over time. This can be seen most clearly in *Section 3, Exhibit J, Projection of UAAL balances and payments* starting on page 103.

Maturity measures

In the last 10 years the ratio of members in pay status to active participants has increased from 0.94 to 1.02. An increased ratio indicates that the plan has grown in maturity over time. This is to be expected, but is also informative for understanding plan sensitivity to particular risks. For more details see *Section 2, Subsection A, Member information* on page 18.

As pension plans mature, the cash needed to fulfill benefit obligations will increase over time. Therefore, cash flow projections and analysis should be performed to assure that the Plan's asset allocation is aligned to meet emerging pension liabilities. Over the past year, benefits and expenses paid were \$116 million more than contributions received. Plans with high levels of negative cash flows may have a need for a larger allocation to income generating assets, which can create a drag on investment return. However, the Plan currently has a low level of negative cash flow and is relatively well funded (at a 91.0% funded ratio). For more details on historical cash flows see *Section 2, Subsection B, Financial information* on page 22.

A further discussion of plan maturity measures and how they relate to changes in assets and liabilities is included in *Section 2, Subsection J, Volatility ratios* on page 52.

Low-Default-Risk Obligation Measure (LDRM)

Actuarial Standard of Practice No. 4 (ASOP 4) *Measuring Pension Obligations and Determining Pension Plan Costs or Contributions* requires the disclosure of a Low-Default-Risk Obligation Measure (LDRM) when performing a funding valuation. The LDRM presented in this report is calculated using the same methodology and assumptions used to determine the AAL used for funding, except for the discount rate. The LDRM is required to be calculated using "a discount rate...derived from low-default-risk fixed income securities whose cash flows are reasonably consistent with the pattern of benefits expected to be paid in the future."

The LDRM is a calculation assuming a plan's assets are invested in an all-bond portfolio, generally lowering expected long-term investment returns. The discount rate selected and used for this purpose is the Bond Buyer General Obligation 20-year Municipal Bond Index Rate, published at the end of each week. The last published rate in December of the measurement period, by The Bond Buyer, is 4.08% for use effective December 31, 2024. This is the rate used to determine the discount rate for valuing reported public

Section 2: Actuarial Valuation Results

pension plan liabilities in accordance with Governmental Accounting Standards when plan assets are projected to be insufficient to make projected benefit payments, and the 20-year period reasonably approximates the duration of plan liabilities. The LDROM is not used to determine a plan's funded status or actuarially determined contribution rates. The plan's expected return on assets, currently 6.75%, is used for these calculations.

As of December 31, 2024, the LDROM for the Plan is \$18.6 billion.¹ The difference between the Plan's AAL of \$13.0 billion and the LDROM can be thought of as the increase in the AAL if the entire portfolio were invested in low-default-risk securities. Alternatively, this difference could also be viewed as representing the expected savings from investing in the Plan's diversified portfolio compared to investing only in low-default-risk securities.

ASOP 4 requires commentary to help the intended user understand the significance of the LDROM with respect to the funded status of the plan, plan contributions, and the security of member benefits. In general, if plan assets were invested exclusively in low-default-risk securities, the funded status would be lower and the actuarially determined contribution would be higher. While investing in a portfolio with low-default-risk securities may be more likely to reduce investment volatility and the volatility of employer contributions, it also may be more likely to result in higher employer contributions or lower benefits.

¹ For comparison purposes, as of December 31, 2023, the LDROM was \$20.3 billion based on a discount rate of 3.26%, while the Plan's AAL was \$12.4 billion.

Section 2: Actuarial Valuation Results

J. Volatility ratios

Retirement plans are subject to volatility in the level of required contributions. This volatility tends to increase as retirement plans become more mature.

The Asset Volatility Ratio (AVR), which is equal to the market value of assets divided by total projected compensation, provides an indication of the potential contribution volatility for any given level of investment volatility. A higher AVR indicates that the plan is subject to a greater level of contribution volatility. This is a current measurement since it is based on the current level of assets.

The current AVR is about 9.2. This means that a 1% asset gain or loss (relative to the assumed investment return) translates to about 9.2% of one-year's payroll. Since actuarial gains and losses are amortized over 18 years, there would be a 0.7% of payroll decrease/(increase) in the required contribution for each 1% asset gain/(loss).

The Liability Volatility Ratio (LVR), which is equal to the actuarial accrued liability divided by total projected compensation, provides an indication of the longer-term potential for contribution volatility for any given level of investment volatility. This is because, over an extended period of time, the plan's assets should track the plan's liabilities. For example, if a plan is 50% funded on a market value basis, the liability volatility ratio would be double the asset volatility ratio and the plan sponsor should expect contribution volatility to increase over time as the plan becomes better funded.

The LVR also indicates how volatile contributions will be in response to changes in the actuarial accrued liability due to actual experience or to changes in actuarial assumptions. The current total Plan LVR is about 10.3 but is 7.9 for General compared to 20.1 for Safety. This means, for example, that assumption changes will have a greater impact on employer contribution rates for Safety than for General. The total Plan LVR is about 12% higher than the AVR. Therefore, we would expect that contribution volatility will increase over the long term.

Section 2: Actuarial Valuation Results

Volatility Ratios

Asset Volatility Ratio (AVR) versus Liability Volatility Ratio (LVR)

As of December 31	AVR General	AVR Safety	AVR Total	LVR General	LVR Safety	LVR Total
2015	7.1	18.7	9.3	8.4	23.3	11.3
2016	7.2	19.0	9.5	8.3	23.1	11.1

Section 3: Supplemental Information

Exhibit D: Summary of income and expenses on a market value basis

Income and Expenses for Years Ended December 31

Line Description	2024	2023
Contribution income		
• Employer contributions	\$383,818,407	\$373,148,067
• Member contributions	146,314,426	132,103,613
• Less administrative expenses	(13,995,564)	(12,839,955)
– Net contribution income	\$516,137,269	\$492,411,725
Investment income		
• Investment, dividends and other income	\$225,189,009	\$195,660,493
• Asset appreciation	762,669,010	727,267,405
• Less investment and other fees	(60,806,268)	(54,676,968)
– Net investment income	\$927,051,751	\$868,250,930
Total income available for benefits	\$1,443,189,020	\$1,360,662,655
Less benefit payments		
• Benefits paid	\$(619,738,157)	\$(591,888,330)
• Refund of contributions	(9,472,286)	(10,062,502)
• Adjustments, transfers or other expenses	(2,410,394)	(3,522,376)
– Net benefit payments	\$(631,620,837)	\$(605,473,208)
Change in market value of assets	\$811,568,183	\$755,189,447
Net assets at market value at the beginning of the year	\$10,808,858,259	\$10,053,668,812
Net assets at market value at the end of the year	\$11,620,426,442	\$10,808,858,259

Note: Results may be slightly off due to rounding.

Section 3: Supplemental Information

Exhibit E: Summary of plan assets

Statement of Plan Assets as of December 31

Line Description	2024	2023
Cash equivalents	\$1,171,399,164	\$734,330,164
Accounts receivable		
• Securities sold	\$37,238,463	\$7,191,876
• Accrued interest and dividends	24,677,136	23,756,052
• Employer contributions	14,059,901	12,769,540
• Other receivable	315,210	1,354,961
– Total accounts receivable	\$76,290,710	\$45,072,429
Investments		
• Domestic and international stocks	\$5,165,209,633	\$5,340,364,573
• Domestic and international bonds	2,504,561,111	2,165,938,729
• Real estate	597,601,608	516,925,736
• Alternative investments and real assets	2,667,837,425	2,496,664,218
– Total investments at market value	\$10,935,209,777	\$10,519,893,256
Other assets	\$7,145,001	\$5,779,870
Total assets	\$12,190,044,652	\$11,305,075,719
Accounts payable		
• Investment trades	\$(38,532,851)	\$(12,629,837)
• Securities lending liability	(292,741,374)	(229,840,189)
• Employer contributions unearned	(171,628,738)	(192,889,114)
• Other	(66,838,248)	(59,668,319)
– Total accounts payable	\$(569,741,211)	\$(495,027,459)
Deferred outflows of resources	\$1,568,000	\$363,000
Deferred inflows of resources	\$(1,445,000)	\$(1,553,000)
Net assets at market value	\$11,620,426,442	\$10,808,858,259
Net assets at actuarial value	\$11,832,779,196	\$11,340,825,456
Net assets at valuation value	\$11,815,241,998	\$11,323,476,654

Note: Results may be slightly off due to rounding.

Section 3: Supplemental Information

Exhibit F: Summary of reported reserve information

Total Allocated Reserves as of December 31

Line Description	2024	2023
Member		
• Member Deposits ¹	\$1,233,089,533	\$1,144,000,073
• Member Cost of Living ¹	588,240,218	559,479,238

2020	336,356,723	113,494,191	10,749,625	882,394,059	508,270,165	10,070,237,862	9,662,282,926	95.9%
2021	410,759,608	117,016,915	11,237,383	1,407,343,614	540,354,863	11,453,765,753	10,434,412,288	91.1%
2022	352,383,785	122,303,823	11,537,709	(1,281,907,363)	581,339,475	10,053,668,812	10,861,822,062	108.0%
2023	373,148,067	132,103,613	12,839,955	868,250,930	605,473,208	10,808,858,259	11,323,476,654	104.8%
2024	383,818,407	146,314,426	13,995,564	927,051,751	631,620,837	11,620,426,442	11,815,241,998	101.7%

Note: Results may be slightly off due to rounding.

¹ Prior to 2017, employer contributions include “employer subvention of member contributions” and exclude “member subvention of employer contributions”.

² Prior to 2016, administrative expenses were shown as an offset to the net investment return.

³ On a market basis, net of investment fees beginning with the year ended December 31, 2016. Prior to 2016, shown net of both investment fees and administrative expenses.

Section 3: Supplemental Information

Exhibit H: Amortization bases

Total Plan — All Cost Groups Combined

Amortization Base Type	Established December 31	Initial Amount	Initial Period	Outstanding Balance	Years Remaining ¹	Annual Payment ²

Assumption Change	2015	114,345,251	18	81,282,755	5	18,066,643
Actuarial Gain	2016	(46,362,239)	18	(34,528,884)	5	(7,674,703)

¹ Reflects the adjustment to UAAL amortization periods adopted by the Board in 2023 for amortization layers established between December 31, 2012 and December 31, 2018.

² As of middle of year.

³ Effective with the December 31, 2010 valuation, leave cashout (terminal pay) assumptions are now based on cost groups.

⁴ Effective with the December 31, 2013 valuation, the leave cashout assumptions were reduced to reflect AB 197.

⁵ Effective with the December 31, 2014 valuation, leave cashout (terminal pay) assumptions were eliminated for Cost Group 9.

Assumption Change	2021	223,522,296	18	213,633,614	15	18,726,849
San Ramon UAAL Prepayment	2022	(286,847)	18	(279,344)	16	(23,332)
Actuarial Loss	2022	341,894,603	18	332,951,424	16	27,809,864

¹ Reflects the adjustment to UAAL amortization periods adopted by the Board in 2023 for amortization layers established between December 31, 2012 and December 31, 2018.

² As of middle of year.

³ As part of East Fire's annexation into CCCFPD, East Fire made a prepayment of \$3,344,437 on June 30, 2022 towards their December 31, 2020 UAAL balance. As requested by East Fire, the prepayment has been used to reduce CCCFPD's UAAL contribution rates effective July 1, 2022. The amount shown as the initial amount of \$3,021,672 is equal to \$3,344,437 discounted with interest from June 30, 2022 to December 31, 2020.

Section 3: Supplemental Information

Amortization Base Type	Established December 31	Initial Amount	Initial Period	Outstanding Balance	Years Remaining ¹	Annual Payment ²
San Ramon UAAL Prepayment	2023	\$(295,995)	18	\$(292,589)	17	\$(23,375)
IHSS UAAL Prepayment	2023	(92,497)	18	(91,433)	17	(7,305)
Actuarial Loss ³	2023	154,058,919	18	152,286,400	17	12,166,237
Actuarial Loss ³	2024	183,658,509	18	183,658,509	18	14,081,316
Assumption Change ⁴	2024	(45,970,871)	18	(45,970,871)	18	(3,524,640)
Cost Group 6 — Actuarial Surplus	2024	(26,148)	N/A	(26,148)	N/A	0
Subtotal — All Cost Groups				\$1,159,970,335		\$169,355,859
Withdrawn Employers ⁵				7,677,678		
Total CCCERA				\$1,167,648,013		

Note: Results may be slightly off due to rounding.

¹ Reflects the adjustment to UAAL amortization periods adopted by the Board in 2023 for amortization layers established between December 31, 2012 and December 31, 2018.

² As of middle of year.

³ Excludes the actuarial loss for Cost Group 6 and the withdrawn employers. Cost Group 6 was in surplus for both the December 31, 2023 and December 31, 2024 valuations.

⁴ Excludes assumption change impact for Cost Group 6 and the withdrawn employers. Cost Group 6 was in surplus for both the December 31, 2023 and December 31, 2024 valuations.

⁵ Effective with the December 31, 2016 valuation, the three withdrawn employers (i.e., Diablo Water District, Delta Diablo Sanitation District and City of Pittsburg) have been moved from Cost Groups 1, 2 and 7 into their own Withdrawn Employers Cost Group.

Section 3: Supplemental Information

Actuarial Loss	2023	25,063,417	18	24,775,051	17	1,979,291
Actuarial Loss	2024	27,164,340	18	27,164,340	18	2,082,722
Assumption Change ³	2024	503,540	18	503,540	18	38,607
Subtotal – Cost Groups 7 and 9				\$256,988,825		\$39,409,865

Note: Results may be slightly off due to rounding.

¹ Reflects the adjustment to UAAL amortization periods adopted by the Board in 2023 for amortization layers established between December 31, 2012 and December 31, 2018.

² As of middle of year.

³ For Cost Groups 7 and 9, there is an increase in UAAL from all assumption changes combined mainly due to less savings available from the new mortality tables that predict lower life expectancies for payees at advanced ages. This is because the average age of retirees for these cost groups is younger than other Safety cost groups.

Section 3: Supplemental Information

Cost Group 8 – Contra Costa County Fire Protection District

Amortization Base Type	Established December 31	Initial Amount ^{1,2}	Initial Period	Outstanding Balance	Years Remaining ³	Annual Payment ⁴

Note: Results may be slightly off due to rounding.

¹ Reflects the adjustment to UAAL amortization periods adopted by the Board in 2023 for amortization layers established between December 31, 2012 and December 31, 2018.

² As of middle of year. The annual payment amounts shown for the Special Adjustments represent the credit allocated to the employer to reflect special contributions. These adjustments serve to reduce the UAAL contribution rate for these employers.

Section 3: Supplemental Information

Exhibit I: Projection of UAAL balances and payments

Outstanding Balance of \$1,160 Million in Net UAAL as of December 31, 2024
(Excludes Withdrawn Employers, \$ in Millions)

Section 3: Supplemental Information

Annual Payments Required to Amortize \$1,160 Million in Net UAAL as of December 31, 2024
(Excludes Withdrawn Employers, \$ in Millions)

Section 4: Actuarial Valuation Basis

Exhibit 1: Actuarial assumptions, methods and models

Rationale for assumptions

The information and analysis used in selecting each assumption that has a significant effect on this actuarial valuation is shown in the January 1, 2021 through December 31, 2023 Actuarial Experience Study report dated April 30, 2025. Unless otherwise noted, all actuarial assumptions and methods shown below apply to all tiers. These assumptions were adopted by the Board.

Net investment return

6.75%; net of investment expenses.

Based on the Actuarial Experience Study referenced above, expected investment expenses (excluding investment manager fees) represent about 0.05% of the actuarial value of assets.

Administrative expenses

1.18% of payroll allocated between the employer and member based on normal cost (before expenses) for the employer and member. This assumption is subject to change each year based on the actual administrative expenses as a percent of actual covered payroll during the calendar year ending on the valuation date.

For the 2024 calendar year, actual administrative expenses were \$13,995,564 and actual covered payroll was \$1,189,383,959. This results in an administrative expense assumption of 1.18% of payroll, allocated between the employer and member as shown below:

Allocation of Administrative Expense Load Between Employer and Member

Line Description	Average Normal Cost Before Expenses	Weighting for Administrative Expense	Administrative Expense Load
Employer	13.92%	54.74%	0.65%
Member	11.51%	45.26%	0.53%
Total	25.43%	100.00%	1.18%

Section 4: Actuarial Valuation Basis

The basic member rate is increased by the administrative expense allocated to the member. The employer normal cost rate is increased by the same percent of payroll as the basic member rate, while the remaining administrative expense allocated to the employer is used to increase the employer UAAL rate. This methodology is used to maintain a 50:50 sharing of normal cost for those in the PEPRA tiers. The table below shows this allocation.

Allocation of Administrative Expense Load to Contribution Rate Components (% of Payroll)

Contribution Rate Component	Administrative Expense Load
Employer basic normal cost rate	0.53%
Employer basic UAAL rate	0.12%
Member basic rate	0.53%
Total administrative expense load	1.18%

Member contribution crediting rate

6.75%, compounded semi-annually.

Inflation rate

Increases of 2.50% per year.

Cost of Living Adjustment (COLA)

Increases of 2.75% per year.

- The actual COLA granted by CCCERA on April 1, 2025 has been reflected for non-active members in the December 31, 2024 valuation.
- For members that have COLA banks, the COLA banks have been reflected in projected future COLAs.
- Benefits are subject to a maximum COLA per year, which varies based on the member's tier and retirement type.

Section 4: Actuarial Valuation Basis

Maximum COLA

General Membership Tier	Safety Membership Tier	Maximum COLA Per Year	COLA Valued (Before Application of COLA Banks)
• Tier 1 • Tier 3 (non-disability) • Tier 4 • Tier 5 (non-disability)	• Tier A • Tier D	3.00%	2.75%
• Tier 2 • Tier 3 (disability) • Tier 5 (disability)	• N/A	4.00%	2.75%
• Tier 4 and Tier 5 members covered under certain MOUs	• Tier C • Tier E	2.00%	2.00%

Payroll growth

Inflation of 2.50% per year plus “across-the-board” salary increase of 0.50% per year.

The payroll growth assumption is used to amortize the unfunded actuarial accrued liability as a level percentage of payroll.

Increase in Internal Revenue Code Section 401(a)(17) compensation limit

Increase of 2.50% per year from the valuation date.

Increase in Section 7522.10 compensation limit

Increase of 2.50% per year from the valuation date.

Section 4: Actuarial Valuation Basis

Salary increases

The annual rate of compensation increase includes:

- Inflation at 2.50%, plus
- “Across-the-board” salary increase of 0.50% per year, plus
- Merit and promotion increase based on years of service:

Section 4: Actuarial Valuation Basis

Merit and Promotion Increases (%)

Years of Service	General Legacy	General PEPRA	Safety Legacy	Safety PEPRA
Less than 1	11.00	9.00	12.00	10.00

18–19	0.80	0.80	1.50	1.50
19–20	0.75	0.75	1.75	1.75
20–21	0.75	0.75	1.75	1.75
21–22	0.60	0.60	1.40	1.40
22–23	0.60	0.60	1.30	1.30
23–24	0.60	0.60	1.25	1.25
24–25	0.60	0.60	1.15	1.15
25 and over	0.55	0.55	1.10	1.10

The average total assumed salary increase for active members in the December 31, 2024 actuarial valuation is 4.1%.

Section 4: Actuarial Valuation Basis

Post-retirement mortality rates

The Pub-2016 mortality tables and adjustments as shown below reasonably reflect the mortality experience as of the measurement date. These mortality tables were adjusted to future years using generational projection to reflect future mortality improvement between the measurement date and those years.

Healthy

- **General members**
 - Pub-2016 General Healthy Retiree Amount-Weighted Above-Median Mortality Table (separate tables for males and females) with rates increased by 5% for females, projected generationally with the two-dimensional mortality improvement scale MP-2021.
- **Safety members**
 - Pub-2016 Safety Healthy Retiree Amount-Weighted Above-Median Mortality Table (separate tables for males and females) with rates increased by 5% for males and decreased by 5% for females, projected generationally with the two-dimensional mortality improvement scale MP-2021.

Disabled

- **General members**
 - Pub-2016 Non-Safety Disabled Retiree Amount-Weighted Mortality Table (separate tables for males and females) with rates increased by 5% for males and females, projected generationally with the two-dimensional mortality improvement scale MP-2021.
- **Safety members**
 - Pub-2016 Safety Disabled Retiree Amount-Weighted Mortality Table (separate tables for males and females) with rates increased by 5% for males and decreased by 5% for females, projected generationally with the two-dimensional mortality improvement scale MP-2021.

Beneficiary

- **Beneficiaries not currently in pay status**
 - Pub-2016 General Healthy Retiree Amount-Weighted Above-Median Mortality Table (separate tables for males and females) with rates increased by 5% for females, projected generationally with the two-dimensional mortality improvement scale MP-2021.

Section 4: Actuarial Valuation Basis

- **Beneficiaries in pay status**

- Pub-2016 Contingent Survivor Amount-Weighted Above-Median Mortality Table (separate tables for males and females) with rates increased by 5% for males and females, projected generationally with the two-dimensional mortality improvement scale MP-2021.

Pre-retirement mortality rates

- **General members**

- Pub-2016 General Employee Amount-Weighted Above-Median Mortality Table (separate tables for males and females) with rates decreased by 5% for males and females, projected generationally with the two-dimensional mortality improvement scale MP-2021.

- **Safety members**

- Pub-2016 Safety Employee Amount-Weighted Above-Median Mortality Table (separate tables for males and females), projected generationally with the two-dimensional mortality improvement scale MP-2021.

Pre-Retirement Mortality Rates (%) — Before Generational Projection from 2016

Age	General Male	General Female	Safety Male	Safety Female
20	0.02	0.01	0.02	0.01
25	0.03	0.01	0.03	0.01
30	0.03	0.01	0.04	0.02
35	0.04	0.02	0.04	0.03
40	0.05	0.04	0.05	0.04
45	0.08	0.05	0.07	0.06
50	0.12	0.08	0.10	0.09
55	0.18	0.12	0.16	0.13
60	0.28	0.18	0.27	0.20
65	0.42	0.28	0.45	0.32
70	0.65	0.43	0.84	0.50

All pre-retirement deaths are assumed to be non-service-connected related.

Section 4: Actuarial Valuation Basis

Mortality rates for member contributions¹

- **General Members**

- Pub-2016 General Healthy Retiree Amount-Weighted Above-Median Mortality Table (separate tables for males and females) with rates increased by 5% for females, projected 30 years (from 2016) with the two-dimensional mortality improvement scale MP-2021, weighted 30% male and 70% female.

- **Safety Members**

- Pub-2016 Safety Healthy Retiree Amount-Weighted Above-Median Mortality Table (separate tables for males and females) with rates increased by 5% for males and decreased by 5% for females, projected 30 years (from 2016) with the two-dimensional mortality improvement scale MP-2021, weighted 85% male and 15% female.

Disability

Disability Incidence Rates (%)

Age	General Tier 1 and Tier 4	General Tier 3 and Tier 5	Safety
22	0.00	0.00	0.10
27	0.00	0.00	0.10
32	0.03	0.02	0.40
37	0.06	0.04	0.55
42	0.20	0.07	0.65
47	0.40	0.09	1.10
52	0.60	0.14	3.75
57	0.60	0.14	3.75
62	0.60	0.14	4.25
67	0.60	0.14	5.00
70 and over	0.60	0.14	5.00

¹ These mortality rates are used for calculating the member basic contribution rates for General Tier 1, Tier 2 and Tier 3, as well as Safety Tier A and Tier C.

Section 4: Actuarial Valuation Basis

Assumed Percentage of Future Disabled Members Receiving a Service-Connected or Non-Service-Connected Disability

Membership Tier	Service-Connected Disabilities	Non-Service-Connected Disabilities
General Tier 1 and Tier 4	70%	30%
General Tier 3 and Tier 5	25%	75%
Safety	100%	0%

Section 4: Actuarial Valuation Basis

Termination

Termination Rates (%)

Years of Service	General	Safety
Less than 1	14.50	9.00
1–2	10.50	7.00
2–3	9.50	6.00
3–4	7.00	5.00
4–5	6.50	3.50
5–6	6.00	3.50
6–7	5.50	3.00
7–8	5.00	2.50
8–9	5.00	2.25
9–10	4.00	2.00
10–11	4.00	2.00
11–12	4.00	2.00
12–13	3.00	2.00
13–14	2.50	1.80
14–15	2.50	1.50
15–16	2.50	1.40
16–17	2.50	1.30
17–18	1.75	1.20
18–19	1.75	1.10
19–20	1.50	1.00
20 and over	1.50	0.25

The member is assumed to receive the greater of a refund of member contributions or the present value of a deferred retirement benefit.

No termination is assumed after a member is first assumed to retire.

¹ There is no longer any Tier A non-enhanced active members after RHFPD was annexed into CCCFPD effective July 1, 2025.

Section 4: Actuarial Valuation Basis

Inactive members

Current and Future Inactive Member Assumptions

Category	% of Future ¹ Inactive Members	Annual Salary Increases from Separation Date	Retirement Age
General <i>with</i> reciprocity	20%	3.55%	61
General <i>without</i> reciprocity	80%	N/A	60
Safety <i>with</i> reciprocity	50%	4.10%	53
Safety <i>without</i> reciprocity	50%	N/A	50

Inactive member benefit

Inactive members are assumed to receive the greater of an immediate refund of their member contributions or the present value of a deferred retirement benefit.

Future benefit accruals

1.0 year of service per year for full-time employees. Continuation of current partial service accrual for part-time employees.

Unknown data for members

- Same as those exhibited by members with similar known characteristics.
- If not specified, General members are assumed to be female and Safety members are assumed to be male.

Definition of active members

All active members of CCCERA as of the valuation date.

Form of payment

- All active and inactive members are assumed to elect the unmodified option at retirement.
- There is no explicit assumption for children's benefits.

¹ CCCERA provides the reciprocity status for current deferred vested members in the valuation census data.

Section 4: Actuarial Valuation Basis

Survivor assumptions

Current Active and Inactive Member Eligible Survivor Assumptions

Member Gender	% with Eligible Survivor at Retirement or Pre-Retirement Death	Eligible Survivor Age	Eligible Survivor Gender
Male member	70%	3 years younger than member	Female
Female member	55%	2 years older than member	Male

Active death optional form election

All active members with five or more years of service are assumed to elect the optional settlement 2 allowance that leaves a 100% continuance to their beneficiary upon the member's non-service connected pre-retirement death. For those who are assumed to be not married at pre-retirement death:

Active Death Optional Form Election Assumptions

BeneficiaryType	Percentage %	Age Difference with Active Member
Child	30%	30 years younger
Parent	30%	30 years older
Sibling and other	40%	Same age

Offsets by other plans of the employer for disability benefits

The Plan requires members who retire because of disability from General Tier 3 and General Tier 5 to offset the Plan's disability benefits with other Plans of the employer. We have not assumed any offsets in this valuation.

Section 4: Actuarial Valuation Basis

Leave cashout

General Tier 1, Tier 2 and Tier 3 & Safety Tier A and Tier C

Leave Cashout as Percentage of Final Average Pay

Cost Group	Leave Cashout
Cost Group 1	1.25%
Cost Group 2	0.60% for Tier 2 0.75% for Tier 3
Cost Group 3	5.50%
Cost Group 4	1.75%
Cost Group 5	0.75%
Cost Group 6	0.00%
Cost Group 7	0.50%
Cost Group 8	0.20%
Cost Group 9	0.00%
Cost Group 10	0.00%
Cost Group 11	3.00%
Withdrawn Employers	0.00%

General Tier 4 and Tier 5 & Safety Tier D and Tier E

None.

Section 4: Actuarial Valuation Basis

Service from accumulated sick leave

Additional Service Converted from Accumulated Sick Leave

Retirement Type and Membership Group	Converted Sick Leave as % of Service at Retirement
Service Retirements	
General	1.00%
Safety	1.70%
Disability Retirements	
General	0.08%
Safety	0.90%

Pursuant to Section 31641.01, the cost of this benefit for the non-PEPRA tiers will be charged only to employers and will not affect member contribution rates.

Actuarial cost method

Entry Age Actuarial Cost Method.

Entry age is the age on the valuation date minus the lesser of years of employment or benefit service. Normal cost and actuarial accrued liability are calculated on an individual basis and are based on costs allocated as a level percentage of compensation. The normal cost rate is calculated assuming their entry age is the date they entered service with CCCERA.

Actuarial value of assets

Market value of assets less unrecognized returns in each of the last nine semi-annual accounting periods. Unrecognized returns are equal to the difference between the actual market return and the expected return on the market value and are recognized semi-annually over a five-year period.

Valuation value of assets

The actuarial value of assets reduced by the value of the non-valuation reserves and designations.

Section 4: Actuarial Valuation Basis

Amortization policy

The UAAL as of December 31, 2014 is amortized over separate amortization layers based on the valuations during which each separate layer was previously established.

- Any new UAAL as a result of actuarial gains or losses identified in the annual valuation as of December 31 will be amortized over a period of 18 years.¹
- Any new UAAL as a result of change in actuarial assumptions or methods will be amortized over a period of 18 years.
- Unless the Board adopts an alternative amortization period after receiving an actuarial analysis:
 - With the exception noted below, the increase in UAAL as a result of any plan amendments will be amortized over a period of 10 years;
 - The entire increase in UAAL resulting from a temporary retirement incentive will be funded in full upon adoption of the incentive. If the increase in UAAL is due to the impact of benefits resulting from additional service permitted in Section 31641.04 of the 1937 CERL (Golden Handshake), the entire increase in UAAL will be funded in full upon adoption of the Golden Handshake.

The UAAL will be amortized over “closed” amortization periods so that the amortization period for each layer decreases by one year with each actuarial valuation.

The UAAL will be amortized as a level percentage of payroll so that the amortization amount in each year during the amortization period shall be expected to be a level percentage of covered payroll, taking into consideration the current payroll growth assumption.

If an overfunding or “surplus” exists (i.e., the VVA exceeds the AAL, so that the total of all UAAL amortization layers becomes negative), any prior UAAL amortization layers will be considered fully amortized, and any subsequent UAAL will be amortized as the first of a new series of amortization layers, using the above amortization periods.

If the surplus exceeds 20% of the AAL per Section 7522.52 of the Government Code, then the amount of surplus in excess of 20% of the AAL (and any subsequent surpluses in excess of that amount) will be amortized over an “open” amortization period of 30 years, but only if the other conditions of Section 7522.52 have also been met. If those conditions are not met, then the surplus will not be amortized and the full normal cost will be contributed.

These amortization policy components will generally apply separately to each of CCCERA’s UAAL cost groups with the exception that the conditions of Section 7522.52 apply to the total plan.

¹ Starting with the December 31, 2023 valuation, the Board approved an adjustment to the remaining amortization periods for certain amortization layers in order to minimize the contribution rate tail volatility associated with the UAAL layers established as of December 31, 2012 through December 31, 2018. This is done by setting the remaining amortization period for those UAAL layers to six years in the 2023 valuation.

Section 4: Actuarial Valuation Basis

Employer contributions

The recommended employer contributions are provided in *Section 2, Subsection F*. Employer contributions consist of two components:

Normal Cost

The annual contribution rate that, if paid annually from a member's first year of membership through the year of retirement, would accumulate to the amount necessary to fully fund the member's retirement-related benefits. Accumulation includes annual crediting of interest at the assumed investment earning rate.

The contribution rate is expressed as a level percentage of the member's compensation.

Contribution to the UAAL

The annual contribution rate that, if paid annually over the UAAL amortization period, would accumulate to the amount necessary to fully fund the UAAL. Accumulation includes annual crediting of interest at the assumed investment earning rate.

The contribution (or rate credit in the case of a negative UAAL) is calculated to remain as a level percentage of future active member payroll (including payroll for new members as they enter the Association) assuming a constant number of active members. In order to remain as a level percentage of payroll, amortization payments (or credits) are scheduled to increase at the current payroll growth assumption.

The amortization policy is described under the "Amortization policy" noted above.

The General Tier 4 (2% COLA) membership tier in Cost Group 1 continues to not have any actual members as of December 31, 2024. The contribution rates for this cost group have been developed in this valuation assuming that the demographic profiles (e.g., entry age, composition of male versus female, etc.) for this cost group can be approximated by the data profiles of current active members within the PEPRA tiers.

Section 4: Actuarial Valuation Basis

Member contributions

The member contribution rates for all members are provided in *Section 4, Exhibit 3*.

Non-PEPRA Members

Articles 6 and 6.8 of the 1937 Act define the methodology to be used in the calculation of member basic contribution rates for non-PEPRA General and Safety members, respectively. The member's basic contribution rate is determined so that, if paid annually from a member's first year of membership through the prescribed retirement age, would accumulate to the amount necessary to fund an annuity that is equal to:

- 1/120 of one year Final Average Salary per year of service at age 55 for General Tier 1 and Tier 3 Non-Enhanced members
- 1/100 of one year Final Average Salary per year of service at age 50 for Safety Tier A Non-Enhanced members
- 1/120 of one year Final Average Salary per year of service at age 60 for General Tier 1 and Tier 3 Enhanced members
- 1/100 of one year Final Average Salary per year of service at age 50 for Safety Tier A Enhanced members
- 1/100 of three year Final Average Salary per year of service at age 50 for Safety Tier C Enhanced members

Members also pay 50% of the cost-of-living benefit and all member contributions are accumulated at an annual interest rate adopted annually by the Board.

- Note that recently negotiated MOU's for County General members no longer include the 50% employer subvention of the members' basic contributions.
- Districts pay varying portions of the members' basic contributions on a nonrefundable basis.
- For most Safety Tier A employers, Safety members also subvent a portion of the employer rate, currently up to 9% of compensation (depending on their MOU).

Effective with the December 31, 2014 valuation, for determining the cost of the total benefit (i.e., basic and COLA components), the leave cashout assumptions are recognized in the valuation as an employer and member cost. Prior to the December 31, 2014 valuation, for determining the cost of the basic benefit (i.e., non-COLA component), the leave cashout assumptions were recognized in the valuation only as an employer cost and did not affect member contribution rates. In other words, the leave cashout assumptions were only used in establishing COLA member contribution rates.

Section 4: Actuarial Valuation Basis

As a result of including the leave cashout assumptions in the basic member rates for the members of each specific cost group, the COLA member rates are no longer pooled across all members of the same tier. This results in eleven different sets of member contribution rates for each specific cost group.

PEPRA Members

Pursuant to Section 7522.30(a) of the Government Code, PEPRA members are required to contribute at least 50% of the normal cost rate. We have assumed that exactly 50% of the normal cost would be paid by PEPRA members. In addition, we have calculated the total normal cost rate for the PEPRA tiers to the nearest one fiftieth of one percent (i.e., the nearest even one-hundredth) as that will allow the normal cost rate to be shared exactly 50:50 without going beyond two decimal places.

The member contribution rates for all members are provided in *Section 4, Exhibit 3*.

Cost sharing adjustments

Starting with the December 31, 2009 Actuarial Valuation, the Board took action to depool CCCERA's assets, liabilities and normal cost by employer when determining employer contribution rates. The Board action included a review of experience back to December 31, 2002. This did not involve recalculation of any employer rates prior to December 31, 2009. However, it did involve reflecting the separate experience of the employers in each individual cost group back from December 31, 2002 through December 31, 2009. The cost groups are detailed in *Appendix C*. In addition, the Board action called for a discontinuation of certain cost sharing adjustments for both member and employer contribution rates for General Tier 1 and Safety Tier A. Even under the depooling structure, there are a few remaining cost sharing arrangements. Here is a summary of the cost sharing arrangements that were implemented in the December 31, 2009 Actuarial Valuation:

- Smaller employers (less than 50 active members as of December 31, 2009) were pooled with the applicable County tier.
 - For the December 31, 2009 through December 31, 2018 valuations, Safety members from the East Contra Costa Fire Protection District were pooled with Safety members of the Contra Costa County Fire Protection District.
 - Starting with the December 31, 2019 valuation the Safety members from the East Contra Costa Fire Protection District were depooled from the Safety members of the Contra Costa County Fire Protection District based on AAL.
 - Starting with the December 31, 2021 valuation the General and Safety members from the East Contra Costa Fire Protection District have become General and Safety members of Contra Costa County Fire Protection District, effective with the July 1, 2022 annexation of East Contra Costa Fire Protection District into Contra Costa County Fire Protection District.
 - Effective July 1, 2025, Rodeo-Hercules Fire Protection District was annexed into Contra Costa County Fire Protection District. Consistent with the annexation, starting with the December 31, 2024 valuation, the General and Safety members from the

Section 4: Actuarial Valuation Basis

Rodeo-Hercules Fire Protection District have become General and Safety members of Contra Costa County Fire Protection District.

- Due to a statutory requirement, the Superior Court was pooled with the County regardless of how many members the Court has.
- UAAL costs are pooled between Cost Group 1 and Cost Group 2 which represent General County and Small Districts.
- UAAL costs are pooled between Cost Group 7 and Cost Group 9 which represent Safety County.

Additional contribution rate adjustments

Adjustments are made to the UAAL amounts for Local Agency Formation Commission (LAFCO) and In-Home Supportive Services Authority (IHSS) to account for special contributions that have previously been made. These adjustments serve to reduce the UAAL contribution rate for these employers.

The outstanding balances of these adjustments as of December 31, 2024 are as follows:

Contribution Component	LAFCO General ¹	IHSS General
Basic	\$113,075	\$68,575
COLA	0	22,858

Internal Revenue Code Section 415

Section 415 of the Internal Revenue Code (IRC) specifies the maximum benefits that may be paid to an individual from a defined benefit plan and the maximum amounts that may be allocated each year to an individual's account in a defined contribution plan.

A qualified pension plan may not pay benefits in excess of the Section 415 limits. The ultimate penalty for non-compliance is disqualification: active participants could be taxed on their vested benefits and the IRS may seek to tax the income earned on the plan's assets.

In particular, Section 415(b) of the IRC limits the maximum annual benefit payable at the Normal Retirement Age to a dollar limit of \$160,000 indexed for inflation. That limit is \$280,000 for 2025. Normal Retirement Age for these purposes is age 62. These are the

¹ LAFCO made several UAAL prepayments in past valuations. Those prepayments have been amortized over 18 years from the date they were made and allocated to provide Basic and COLA rate credits based on the then current Basic and COLA UAAL rates before the prepayments. Effective with the December 31, 2022 valuation, we re-allocated the outstanding balance of those prepayment credits so that the COLA UAAL rate for LAFCO would be the same as the other employers in Cost Group 1.

Section 4: Actuarial Valuation Basis

limits in simplified terms. They must be adjusted based on each participant's circumstances, for such things as age at retirement, form of benefits chosen and after tax contributions.

Non-PEPRA benefits in excess of the limits may be paid through a qualified governmental excess plan that meets the requirements of Section 415(m).

Legal Counsel's review and interpretation of the law and regulations should be sought on any questions in this regard.

Contribution rates determined in this valuation have not been reduced for the Section 415 limitations. However, it is anticipated that PEPRA members will not be limited in the future due to the PEPRA compensation limit applied in the determination of their benefit. Actual limitations will result in actuarial gains as they occur.

Models

Segal valuation results are based on proprietary actuarial modeling software. The actuarial valuation models generate a comprehensive set of liability and cost calculations that are presented to meet regulatory, legislative and client requirements. Our Actuarial Technology and Systems unit, comprised of both actuaries and programmers, is responsible for the initial development and maintenance of these models. The models have a modular structure that allows for a high degree of accuracy, flexibility and user control. The client team programs the assumptions and the plan provisions, validates the models, and reviews test lives and results, under the supervision of the responsible actuary.

Justification for change in actuarial assumptions, methods or models

Based on past experience and future expectations, the following assumptions have changed since the prior valuation. Previously these assumptions were as follows:

Administrative expenses (prior assumption)

1.17% of payroll allocated between the employer and member based on normal cost (before expenses) for the employer and member. This assumption is subject to change each year based on the actual administrative expenses as a percent of actual covered payroll during the calendar year ending on the valuation date.

Section 4: Actuarial Valuation Basis

Salary increases (prior assumption)

The annual rate of compensation increase includes:

- Inflation at 2.50%, plus
- “Across-the-board” salary increase of 0.50% per year, plus
- Merit and promotion increase based on years of service:

Merit and Promotion Increases (%)

Years of Service	General	Safety
Less than 1	11.00	12.00
1–2	6.50	8.50
2–3	4.75	5.50
3–4	3.50	5.00
4–5	2.50	4.00
5–6	2.00	3.00
6–7	1.75	2.25
7–8	1.65	1.75
8–9	1.45	1.50
9–10	1.35	1.45
10–11	1.30	1.40
11–12	1.10	1.35
12–13	1.00	1.30
13–14	0.90	1.25
14–15	0.80	1.25
15–16	0.75	1.25
16–17	0.70	1.25
17–18	0.65	1.25
18–19	0.60	1.25
19–20	0.55	1.25
20 and over	0.50	1.00

Section 4: Actuarial Valuation Basis

Post-retirement mortality rates (prior assumption)

The Pub-2010 mortality tables and adjustments as shown below reasonably reflect the mortality experience as of the measurement date. These mortality tables were adjusted to future years using the generational projection to reflect future mortality improvement between the measurement date and those years.

Healthy

- **General members**

- Pub-2010 General Healthy Retiree Amount-Weighted Above-Median Mortality Table (separate tables for males and females), projected generationally with the two-dimensional mortality improvement scale MP-2021.

- **Safety members**

- Pub-2010 Safety Healthy Retiree Amount-Weighted Above-Median Mortality Table (separate tables for males and females) increased by 5% for males and decreased by 5% for females, projected generationally with the two-dimensional mortality improvement scale MP-2021.

Disabled

- **General members**

- Pub-2010 Non-Safety Disabled Retiree Amount-Weighted Mortality Table (separate tables for males and females) increased by 5% for males and unadjusted for females, projected generationally with the two-dimensional mortality improvement scale MP-2021.

- **Safety members**

- Pub-2010 Safety Disabled Retiree Amount-Weighted Mortality Table (separate tables for males and females) increased by 5% for males and unadjusted for females, projected generationally with the two-dimensional mortality improvement scale MP-2021.

Beneficiary

- **Beneficiaries not currently in pay status**

- Pub-2010 General Healthy Retiree Amount-Weighted Above-Median Mortality Table (separate tables for males and females), projected generationally with the two-dimensional mortality improvement scale MP-2021.

Section 4: Actuarial Valuation Basis

- **Beneficiaries in pay status**

- Pub-2010 Contingent Survivor Amount-Weighted Above-Median Mortality Table (separate tables for males and females) increased by 5% for males and females, projected generationally with the two-dimensional mortality improvement scale MP-2021.

Pre-retirement mortality rates (prior assumption)

- **General members**

- Pub-2010 General Employee Amount-Weighted Above-Median Mortality Table (separate tables for males and females), projected generationally with the two-dimensional mortality improvement scale MP-2021.

- **Safety members**

- Pub-2010 Safety Employee Amount-Weighted Above-Median Mortality Table (separate tables for males and females), projected generationally with the two-dimensional mortality improvement scale MP-2021.

Pre-Retirement Mortality Rates (%) – Before Generational Projection from 2010

Age	General Male	General Female	Safety Male	Safety Female
20	0.04	0.01	0.04	0.02
25	0.02	0.01	0.03	0.02
30	0.03	0.01	0.04	0.02
35	0.04	0.02	0.04	0.03
40	0.06	0.03	0.05	0.04
45	0.09	0.05	0.07	0.06
50	0.13	0.08	0.10	0.08
55	0.19	0.11	0.15	0.11
60	0.28	0.17	0.23	0.14
65	0.41	0.27	0.35	0.20
70	0.61	0.44	0.66	0.39

All pre-retirement deaths are assumed to be non-service-connected related.

Section 4: Actuarial Valuation Basis

Mortality rates for member contributions¹ (prior assumption)

- **General Members**

- Pub-2010 General Healthy Retiree Amount-Weighted Above-Median Mortality Table (separate tables for males and females), projected 30 years with the two-dimensional mortality improvement scale MP-2021, weighted 30% male and 70% female.

- **Safety Members**

- Pub-2010 Safety Healthy Retiree Amount-Weighted Above-Median Mortality Table (separate tables for males and females) increased by 5% for males and decreased by 5% for females, projected 30 years with the two-dimensional mortality improvement scale MP-2021, weighted 85% male and 15% female.

Disability (prior assumption)

Disability Incidence Rates (%)

Age	General Tier 1 and Tier 4	General Tier 3 and Tier 5	Safety
20	0.01	0.01	0.06
25	0.02	0.02	0.16
30	0.04	0.03	0.32
35	0.08	0.05	0.46
40	0.22	0.07	0.56
45	0.36	0.09	0.96
50	0.52	0.12	2.88
55	0.60	0.16	4.00
60	0.60	0.18	4.30
65	0.60	0.18	4.50
70	0.60	0.18	4.50

¹ These mortality rates are used for calculating the member basic contribution rates for General Tier 1, Tier 2 and Tier 3, as well as Safety Tier A and Tier C.

Section 4: Actuarial Valuation Basis

Assumed Percentage of Future Disabled Members Receiving a Service-Connected or Non-Service-Connected Disability

Membership Tier	Service-Connected Disabilities	Non-Service-Connected Disabilities
General Tier 1 and Tier 4	65%	35%
General Tier 3 and Tier 5	25%	75%
Safety	100%	0%

Section 4: Actuarial Valuation Basis

Termination (prior assumption)

Termination Rates (%)

Years of Service	General	Safety
Less than 1	14.00	11.00
1–2	9.50	9.00
2–3	9.00	7.00
3–4	6.25	5.00
4–5	6.25	4.00
5–6	5.00	3.50
6–7	4.50	3.00
7–8	4.00	2.50
8–9	3.75	2.50
9–10	3.75	2.00
10–11	3.50	2.00
11–12	3.25	2.00
12–13	2.75	2.00
13–14	2.50	1.80
14–15	2.50	1.60
15–16	2.25	1.50
16–17	2.25	1.40
17–18	2.00	1.30
18–19	2.00	1.20
19–20	1.50	1.00
20 and over	1.50	0.50

The member is assumed to receive the greater of a refund of member contributions or the present value of a deferred retirement benefit.

No termination is assumed after a member is first assumed to retire.

Section 4: Actuarial Valuation Basis

Retirement rates (prior assumption)

Retirement Rates (%) – General

Age	Tier 1 Enhanced: Less than 30 Years of Service	Tier 1 Enhanced: 30 or More Years of Service	Tier 3 Enhanced: Less than 30 Years of Service	Tier 3 Enhanced: 30 or More Years of Service	Tier 1 Non-Enhanced	Tier 4 and Tier 5

Inactive members (prior assumption)

Current and Future Inactive Member Assumptions

Category	% of Future ¹ Deferred Vested Members	Annual Salary Increases from Separation Date	Retirement Age
General with reciprocity	40%	3.50%	60
General without reciprocity	60%	N/A	60
Safety with reciprocity	70%	4.00%	53
Safety without reciprocity	30%	N/A	51

Unknown data for members (prior assumption)

- Same as those exhibited by members with similar known characteristics.
- If not specified, members are assumed to be male.

Spousal assumptions (prior assumption)

Current Active and Inactive Member Spousal Assumptions

Member Gender	% with Spouse at Retirement or Pre-Retirement Death	Spouse Age	Spouse Gender
Male member	65%	3 years younger than member	Female
Female member	50%	2 years older than member	Male

¹ CCCERA provides the reciprocity status for current deferred vested members in the valuation census data.

Section 4: Actuarial Valuation Basis

Leave cashout (prior assumption)

General Tier 1, Tier 2 and Tier 3 & Safety Tier A and Tier C

Leave Cashout as Percentage of Final Average Pay

Cost Group	Leave Cashout
Cost Group 1	1.00%
Cost Group 2	0.50% for Tier 2 0.75% for Tier 3
Cost Group 3	5.25%
Cost Group 4	1.00%
Cost Group 5	1.00%
Cost Group 6	0.00%
Cost Group 7	0.50%
Cost Group 8	0.25%
Cost Group 9	0.00%
Cost Group 10	0.25%
Cost Group 11	3.00%
Cost Group 12	1.75%
Withdrawn Employers	0.00%

General Tier 4 and Tier 5 & Safety Tier D and Tier E

None.

Section 4: Actuarial Valuation Basis

Service from accumulated sick leave (prior assumption)

Additional Service Converted from Accumulated Sick Leave

Retirement Type and Membership Group	Converted Sick Leave as % of Service at Retirement
Service Retirements	
General	1.00%
Safety	1.70%
Disability Retirements	
General	0.06%
Safety	1.00%

Pursuant to Section 31641.01, the cost of this benefit for the non-PEPRA tiers will be charged only to employers and will not affect member contribution rates.

Section 4: Actuarial Valuation Basis

Exhibit 2: Summary of Plan provisions

This exhibit summarizes the major provisions of the Plan included in the valuation. It is not intended to be, nor should it be interpreted as, a complete statement of all plan provisions. If the Association should find the plan summary not in accordance with the actual provisions, the Association should alert the actuary so they can both be sure the proper provisions are valued.

Plan year

January 1 through December 31

Membership eligibility

Membership with CCCERA begins on the first day of the month following your employment in an eligible position by the County or a participating employer.

Membership Tier	Plan Provision
General Tier 1	- General members hired before July 1, 1980 who elected not to transfer to Tier 2. - Certain General members with membership dates before January 1, 2013 hired by specific employers who did not adopt Tier 2 are placed in Tier 1.
General Tier 2	- Most General members hired on or after August 1, 1980 and all General members hired before July 1, 1980 and elected to transfer to Tier 2. - Effective October 1, 2002, for the County, Tier 2 was eliminated and all County employees (excluding CNA employees) in Tier 2 were placed in Tier 3. - Effective January 1, 2005, all CNA employees in Tier 2 were placed in Tier 3.
General Tier 3	General members with membership dates before January 1, 2013 who were not placed in Tier 1 are placed in Tier 3.
General Tier 4 and Tier 5	- General members with membership dates on or after January 1, 2013 hired by specific employers who did not adopt Tier 2 are placed in Tier 4. - All other General members with membership dates on or after January 1, 2013 are placed in Tier 5. - These members are designated as PEPRA members and are subject to the provisions of California Government Code 7522 et. seq.
Safety Tier A and Tier C	- Safety members with membership dates before January 1, 2013. - County Sheriff's Department Safety members hired on or after January 1, 2007, but before January 1, 2013 are placed in Safety Tier C Enhanced.

Section 4: Actuarial Valuation Basis

Safety Tier D and Tier E

- Safety members with membership dates on or after January 1, 2013.
- Safety members from certain bargaining units are placed in Safety Tier E.
- These members are designated as PEPRA members and are subject to the provisions of California Government Code 7522 et. seq.

Final average compensation and service for benefit determination

Final Compensation and Service	Plan Provision
Final average compensation	
General Tier 1 and Tier 3 (non-disability) & Safety Tier A	Highest consecutive 12 months of compensation earnable. (§31462.1) (FAS1)
General Tier 2 and Tier 3 (disability) & Safety Tier C	Highest consecutive 36 months of compensation earnable. (§31462) (FAS3)
General Tier 4 and Tier 5 & Safety Tier D and Tier E	Highest consecutive 36 months of pensionable compensation. (§7522.10(c), §7522.32 and §7522.34) (FAS3)
Compensation limit	
General Tier 1, Tier 2 and Tier 3 & Safety Tier A and Tier C	For members with membership dates on or after January 1, 1996, compensation earnable is limited to Internal Revenue Code Section 401(a)(17). The limit is \$350,000 for calendar year 2025 and is indexed for inflation on an annual basis.
General Tier 4 and Tier 5 & Safety Tier D and Tier E	For members with membership dates on or after January 1, 2013, pensionable compensation is limited to California Government Code 7522.10(c). The limit is \$155,081 for calendar year 2025 (\$186,096, if not enrolled in Social Security) and is indexed for inflation on an annual basis.
Social Security primary insurance amount	
General Tier 2	Estimated Social Security award at age 62 assuming level future earnings. (PIA)
Service	
All members	Years of service are generally based on a member's employment during a period of time for which deductions are made from their compensation. Includes accumulated sick leave as of the date of retirement. (§31641.01) (Yrs) A maximum of 30 years of service (Yrs30) is used in the Social Security offset portion of the General Tier 2 benefit formula.

Section 4: Actuarial Valuation Basis

Service retirement benefits

Provision by Tier	Service Retirement Plan Provision
Eligibility	
General Tier 1, Tier 2, and Tier 3	Age 50 with 10 years of service, or age 70 regardless of service or after 30 years of service regardless of age. (§31672)
General Tier 4 and Tier 5	Age 52 with 5 years of service or age 70 regardless of service. (§7522.20(a) and §31672.3)
Safety Tier A and Tier C	Age 50 with 10 years of service, or age 70 regardless of service or after 20 years of service regardless of age. (§31663.25)
Safety Tier D and Tier E	Age 50 with 5 years of service or age 70 regardless of service. (§7522.25(a)) and §31672.3)
Benefit amount	
All members	The benefit formula for all members varies by membership tier and retirement age. See the tables below and on the following pages for a selection of benefit formulas at various ages for each membership tier.
Maximum benefit	
General Tier 1 and Tier 3 & Safety Tier A and Tier C	100% of final compensation. (§31676.11, §31676.16, §31664, §31664.1)
General Tier 2, Tier 4 and Tier 5 & Safety Tier D and Tier E	None.

Service retirement benefit formula (sample ages)

The offsets shown in all benefit formulas only apply to members integrated with Social Security.

Tier and Retirement Age	Service Retirement Benefit Formula by Tier
General Tier 1 (Non-Enhanced) (§31676.11)	
50	$1.24\% \times (\text{FAS1} - \$1,400) \times \text{Yrs}$
55	$1.67\% \times (\text{FAS1} - \$1,400) \times \text{Yrs}$
60	$2.18\% \times (\text{FAS1} - \$1,400) \times \text{Yrs}$
62	$2.35\% \times (\text{FAS1} - \$1,400) \times \text{Yrs}$
65 and over	$2.61\% \times (\text{FAS1} - \$1,400) \times \text{Yrs}$

Section 4: Actuarial Valuation Basis

Tier and Retirement Age	Service Retirement Benefit Formula by Tier
General Tier 1 and Tier 3 (Enhanced) (§31676.16)	
50	$1.43\% \times (\text{FAS1} - \$1,400) \times \text{Yrs}$
55	$2.00\% \times (\text{FAS1} - \$1,400) \times \text{Yrs}$
60	$2.26\% \times (\text{FAS1} - \$1,400) \times \text{Yrs}$
62	$2.37\% \times (\text{FAS1} - \$1,400) \times \text{Yrs}$
65 and over	$2.42\% \times (\text{FAS1} - \$1,400) \times \text{Yrs}$
General Tier 2 (§31752)	
50	$0.83\% \times \text{FAS3} \times \text{Yrs} - 0.57\% \times \text{Yrs30} \times \text{PIA}$
55	$1.13\% \times \text{FAS3} \times \text{Yrs} - 0.87\% \times \text{Yrs30} \times \text{PIA}$
60	$1.43\% \times \text{FAS3} \times \text{Yrs} - 1.37\% \times \text{Yrs30} \times \text{PIA}$
62	$1.55\% \times \text{FAS3} \times \text{Yrs} - 1.67\% \times \text{Yrs30} \times \text{PIA}$
65 and over	$1.73\% \times \text{FAS3} \times \text{Yrs} - 1.67\% \times \text{Yrs30} \times \text{PIA}$
General Tier 4 and Tier 5 (§7522.20(a))	
52	$1.00\% \times \text{FAS3} \times \text{Yrs}$
55	$1.30\% \times \text{FAS3} \times \text{Yrs}$

Disability benefits

Non-service connected disability

Provision by Membership	Non-Service Connected Disability Plan Provision
Eligibility	
General Tier 1 and Tier 4 & Safety	Five years of service. (§31720)
General Tier 2, Tier 3 and Tier 5	Ten years of service. (§31720.1)
Benefit amount	
General Tier 1 and Tier 4	1.5% per year of service. If the benefit does not exceed one-third of final compensation, the service is projected to age 65, but the total projected benefit cannot be more than one-third of final compensation. (§31727) If the member is eligible to receive a service retirement benefit, 100% of the service retirement benefit will be paid if greater than the above.
General Tier 2, Tier 3 and Tier 5	40% of final compensation plus 10% of final compensation used in the benefit determination for each minor child (maximum of three). (§31727.01) If the member is eligible to receive a service retirement benefit, 100% of the service retirement benefit will be paid if greater than the above.
Safety	1.8% per year of service. If the benefit does not exceed one-third of final compensation, the service is projected to age 55, but the total projected benefit cannot be more than one-third of final compensation. (§31727.2) If the member is eligible to receive a service retirement benefit, 100% of the service retirement benefit will be paid if greater than the above.
Offset	
General Tier 1 and Tier 4 & Safety	None.

Section 4: Actuarial Valuation Basis

General Tier 2, Tier 3 and Tier 5

Disability benefits are offset by other plans of the employer except Workers Compensation and Social Security.

Service connected disability

Provision by Membership	Service Connected Disability Plan Provision
Eligibility	
All members	No age or service requirements. (§31720)
Benefit amount	
General Tier 1 and Tier 4 & Safety	50% of the final compensation. (§31727.4) If the member is eligible to receive a service retirement benefit, 100% of the service retirement benefit will be paid if greater than the above.
General Tier 2, Tier 3 and Tier 5	40% of final compensation plus 10% of final compensation for each minor child (maximum of three). (§31727.01) If the member is eligible to receive a service retirement benefit, 100% of the service retirement benefit will be paid if greater than the above.
Offset	
General Tier 1 and Tier 4 & Safety	None.
General Tier 2, Tier 3 and Tier 5	Disability benefits are offset by other plans of the Employer except Workers Compensation and Social Security.

Pre-retirement death benefits

Basic death benefit

Provision by Tier	Basic Death Benefit Plan Provision
Eligibility	
All members	None.
Benefit amount	
General Tier 1, Tier 3, Tier 4 and Tier 5 & Safety	Refund of employee contributions with interest, plus one month's compensation for each year of service, to a maximum of six month's compensation. (§31781)

Section 4: Actuarial Valuation Basis

General Tier 2

Refund of employee contributions with interest, plus \$2,000 lump sum benefit offset by any Social Security payment. (§31781.01)

Optional death allowance

Provision by Tier	Optional Death Allowance Plan Provision
Eligibility	
General Tier 1 and Tier 4 & Safety	Five years of service.
General Tier 2, Tier 3 and Tier 5	Ten years of service.
Benefit amount (non-service connected death)	
All members	Option 2 (100% continuance) of non-service connected disability benefit (or service retirement benefit, if eligible) payable to designated beneficiary.
Benefit amount (service-connected death)	
General Tier 1, Tier 3, Tier 4 and Tier 5 & Safety	50% of final compensation payable to spouse. (§31787) If the member is eligible to receive a service retirement benefit, 100% of the service retirement benefit will be paid if greater than the above.
General Tier 2	60% of service or disability retirement benefit (minimum benefit is 24% of final compensation) plus, for each minor child, 10% of the allowance otherwise paid to the member. Family benefit has a minimum of 60% of the member's allowance and a maximum of 100% of member's allowance.

Post-retirement death benefits

Service retirement or non-service connected disability retirement

Provision by Tier	Post-Retirement Death (Service Retirement or Non-Service Connected Disability Retirement) Benefit Plan Provision
General Tier 1, Tier 3, Tier 4 and Tier 5 & Safety	- Unless another option was selected at retirement, 60% of member's unmodified allowance continues to eligible spouse. - An eligible spouse is a surviving spouse who was married to the member at least one year prior to the member's retirement or at least two years prior to the date of death and has attained age 55 on or prior to the date of death. (§31760.2)

Section 4: Actuarial Valuation Basis

	– An additional lump sum benefit of \$5,000 is payable to the member's beneficiary. (\$31789.5)
General Tier 2	• Unless another option was selected at retirement, 60% of member's unmodified allowance continues to eligible spouse plus 20% of allowance to each minor child. (\$31789.11) – Maximum benefit is 100% of allowance. – An additional lump sum benefit of \$5,000 (\$31789.5) plus \$2,000 less any Social Security lump sum payment (\$31789.01) are payable to the member's beneficiary.

Service connected disability

Provision by Tier	Post-Retirement Death (Service Connected Disability Retirement) Benefit Plan Provision
General Tier 1, Tier 3, Tier 4 and Tier 5 & Safety	• Unless another option was selected at retirement, 100% of member's allowance continued to eligible spouse. (\$31786) – An additional lump sum benefit of \$5,000 is payable to the member's beneficiary. (\$31789.5)
General Tier 2	• Unless another option was selected at retirement, 60% of member's unmodified allowance continues to eligible spouse plus 20% of allowance to each minor child. (\$31789.11) – Maximum benefit is 100% of allowance. – An additional lump sum benefit of \$5,000 (\$31789.5) plus \$2,000 less any Social Security lump sum payment (\$31789.01) are payable to the member's beneficiary.

Withdrawal benefits

Provision by Tier	Withdrawal Benefit Plan Provision
Eligibility	
All members	No age or service requirements.
Vested members	Five years of service
Benefit amount	
All members	Refund of accumulated employee contributions with interest or earned benefit at age 70. (\$31628)
Vested members	If contributions left on deposit, entitled to earned benefits commencing at any time after eligible to retire. (\$31700)

Section 4: Actuarial Valuation Basis

Post-retirement cost-of-living adjustments

Provision by Tier	Post-Retirement Cost-of-Living Adjustment Plan Provision
General Tier 1, Tier 3 (non-disability), Tier 4 and Tier 5 (non-disability) & Safety Tier A and Tier D	Future changes based on Consumer Price Index to a maximum of 3% per year, excess “banked”.
General Tier 2, Tier 3 (disability) and Tier 5 (disability)	Future changes based on Consumer Price Index to a maximum of 4% per year, excess “banked”.
General Tier 4 and Tier 5 (under certain MOUs) & Safety Tier C and Tier E	Future changes based on Consumer Price Index to a maximum of 2% per year, excess “banked”.

Member contributions

Please refer to *Section 4, Exhibit 3* for specific rates.

Provision by Tier	Member Contribution Plan Provision
General Tier 1 and Tier 3 (Non-Enhanced)	
Basic contributions	Entry-age based rates that provide for one-half of the \$31676.11 benefit payable at age 55.
Cost-of-living contributions	Entry-age based rates that provide for one-half of future cost-of-living costs.
General Tier 1 and Tier 3 (Enhanced)	
Basic contributions	Entry-age based rates that provide for an annuity at age 60 equal to 1/120 of FAS1.
Cost-of-living contributions	Entry-age based rates that provide for one-half of future cost-of-living costs.
General Tier 4 and Tier 5	
Contributions	50% of the total normal cost rate.
Safety Tier A (Non-Enhanced)	
Basic contributions	Entry-age based rates that provide for one-half of the \$31664 benefit payable at age 50.
Cost-of-living contributions	Entry-age based rates that provide for one-half of future cost-of-living costs.
Safety Tier A (Enhanced)	
Basic contributions	Entry-age based rates that provide for an annuity at age 50 equal to 1/100 of FAS1.
Cost-of-living contributions	Entry-age based rates that provide for one-half of future cost-of-living costs.
Safety Tier C (Enhanced)	
Basic contributions	Entry-age based rates that provide for an annuity at age 50 equal to 1/100 of FAS3.

Section 4: Actuarial Valuation Basis

Cost-of-living contributions	Entry-age based rates that provide for one-half of future cost-of-living costs.
Safety Tier D and Tier E	
Contributions	50% of the total normal cost rate.

Other information

- Transfers from Tier 1 to Tier 2 were made on an individual voluntary irrevocable basis.
 - Credit is given under Tier 2 for future service only.
 - The cost-of-living adjustment maximum is 4% only for the credit under Tier 2.
 - Transferred Tier 2 members keep the five-year requirement for non-service connected disability.
- Those who were members on or before March 7, 1973 and Safety members with membership dates on or before January 1, 2013 will be exempt from paying member contributions after 30 years of service.

Plan provisions not valued

- Additional \$5,000 lump sum post-retirement death benefit (except for \$2,000 for General Tier 2 members paid out of the valuation value of assets) payable to a member's beneficiary.
 - This benefit is paid from a reserve that is not included in the valuation value of assets and is subject at all times to the availability of funds.

Changes in Plan provisions

The following change in Plan Provisions has been reflected in the current valuation.

As part of the annexation of Rodeo-Hercules Fire Protection District (RHFPD) into Contra Costa County Fire Protection District (CCCFPD), RHFPD members covered under Safety Tier A Non-enhanced have been moved to CCCFPD Safety Tier A Enhanced and receive Tier A enhanced benefit for future service only effective July 1, 2025.

Also, we understand that RHFPD's members will be governed by CCCFPD's employment rules after the annexation and some members in the PEPRA 3% COLA tier may be changed to the PEPRA 2% COLA tier based on their membership dates. The actual PEPRA tier assignments for the RHFPD PEPRA members will be reflected in the December 31, 2025 valuation when the actual tier assignments are provided.

48	14.36%	9.83%	24.19%
49 and over	13.78%	9.42%	23.20%

Interest: 6.75% per annum

Mortality: See *Section 4, Exhibit 1*

Salary increase: Inflation (2.50%) + Across-the-Board Increase (0.50%) + Merit (See *Section 4, Exhibit 1*)

Administrative expense: 0.53% of payroll added to Basic rates

Leave cashout: 3.00%

COLA loading factor: 71.07%, applied to Basic rates prior to adjustment for administrative expenses, based on 2.75% assumed COLA.

Section 4: Actuarial Valuation Basis

Cost Groups 1 through 6 (General) — Member Contribution Rates (Membership on or After January 1, 2013) (% of Monthly Payroll)

Cost Group	Basic	COLA	Total
Cost Group 1 — PEPRA Tier 4 (3% COLA)	9.45%	3.10%	12.55%
Cost Group 1 — PEPRA Tier 4 (2% COLA)	8.98%	2.03%	11.01%
Cost Group 2 — PEPRA Tier 5 (3%/4% COLA)	8.36%	2.69%	11.05%
Cost Group 2 — PEPRA Tier 5 (2% COLA)	8.36%	1.83%	10.19%
Cost Group 3 — PEPRA Tier 4 (3% COLA)	8.41%	2.87%	11.28%
Cost Group 4 — PEPRA Tier 4 (3% COLA)	8.92%	2.93%	11.85%
Cost Group 5 — PEPRA Tier 4 (3% COLA)	10.46%	3.48%	13.94%
Cost Group 5 — PEPRA Tier 4 (2% COLA)	9.83%	2.23%	12.06%
Cost Group 6 — PEPRA Tier 4 (3% COLA)	10.86%	3.55%	14.41%

The PEPRA member contribution rates are 50% of the normal cost rate. The Basic rates shown above include an administrative expense load of 0.53% of payroll.

Note: It is our understanding that in the determination of pension benefits under the PEPRA formulas, the maximum compensation that can be taken into account should be limited by the compensation limit as noted in *Section 4, Exhibit 2* on page 140 (§7522.10). These amounts should be adjusted for changes to the Consumer Price Index for All Urban Consumers for future years (§7522.10(d)).

Section 4: Actuarial Valuation Basis

Cost Groups 7 through 12 (Safety) — Member Contribution Rates (Membership on or After January 1, 2013) (% of Monthly Payroll)

Cost Group	Basic	COLA	Total
Cost Group 7 — PEPRA Tier D	14.63%	6.07%	20.70%
Cost Group 8 — PEPRA Tier D	13.61%	5.67%	19.28%
Cost Group 8 — PEPRA Tier E	12.79%	3.59%	16.38%
Cost Group 9 — PEPRA Tier E	13.67%	3.81%	17.48%
Cost Group 10 — PEPRA Tier D	13.43%	5.70%	19.13%
Cost Group 11 — PEPRA Tier D	11.64%	4.95%	16.59%

The PEPRA member contribution rates are 50% of the normal cost rate. The Basic rates shown above include an administrative expense load of 0.53% of payroll.

Note: It is our understanding that in the determination of pension benefits under the PEPRA formulas, the maximum compensation that can be taken into account should be limited by the compensation limit as noted in *Section 4, Exhibit 2* on page 140 (§7522.10). These amounts should be adjusted for changes to the Consumer Price Index for All Urban Consumers for future years (§7522.10(d)).

Appendix A: Definition of Pension Terms

The following list defines certain technical terms for the convenience of the reader:

Term	Definition
Actuarial accrued liability for actives	The equivalent of the accumulated normal costs allocated to the years before the valuation date.
Actuarial accrued liability for retirees and beneficiaries	Actuarial present value of lifetime benefits to existing retirees and beneficiaries. This sum takes account of life expectancies appropriate to the ages of the annuitants and the interest that the sum is expected to earn before it is entirely paid out in benefits.
Actuarial cost method	A procedure allocating the actuarial present value of future benefits to various time periods; a method used to determine the normal cost and the actuarial accrued liability that are used to determine the actuarially determined contribution.
Actuarial gain or loss	A measure of the difference between actual experience and that expected based upon a set of actuarial assumptions, during the period between two actuarial valuation dates. To the extent that actual experience differs from that assumed, actuarial accrued liabilities emerge which may be the same as forecasted or may be larger or smaller than projected. Actuarial gains are due to favorable experience, e.g., assets earn more than projected, salary increases are less than assumed, members retire later than assumed, etc. Favorable experience means actual results produce actuarial liabilities not as large as projected by the actuarial assumptions. On the other hand, actuarial losses are the result of unfavorable experience, i.e., actual results yield actuarial liabilities that are larger than projected.
Actuarially equivalent	Of equal actuarial present value, determined as of a given date and based on a given set of actuarial assumptions.
Actuarial present value	The value of an amount or series of amounts payable or receivable at various times, determined as of a given date by the application of a particular set of actuarial assumptions. Each such amount or series of amounts is: Adjusted for the probable financial effect of certain intervening events (such as changes in compensation levels, marital status, etc.) Multiplied by the probability of the occurrence of an event (such as survival, death, disability, withdrawal, etc.) on which the payment is conditioned, and Discounted according to an assumed rate (or rates) of return to reflect the time value of money.

Appendix A: Definition of Pension Terms

Term	Definition
Actuarial present value of future benefits	The actuarial present value of benefit amounts expected to be paid at various future times under a particular set of actuarial assumptions, taking into account such items as the effect of advancement in age, anticipated future compensation, and future service credits. The actuarial present value of future benefits includes the liabilities for active members, retired members, beneficiaries receiving benefits, and inactive members entitled to either a refund of member contributions or a future retirement benefit. Expressed another way, it is the value that would have to be invested on the valuation date so that the amount invested plus investment earnings would provide sufficient assets to pay all projected benefits and expenses when due.
Actuarial valuation	The determination, as of a valuation date, of the Normal cost, actuarial accrued liability, actuarial value of assets, and related actuarial present values for a plan, as well as actuarially determined contributions.
Actuarial value of assets	The value of the Plan's assets as of a given date, used by the actuary for valuation purposes. This may be the market or fair value of plan assets, but commonly plans use a smoothed value in order to reduce the year-to-year volatility of calculated results, such as the funded ratio and the actuarially determined contribution.
Actuarially determined	Values that have been determined utilizing the principles of actuarial science. An actuarially determined value is derived by application of the appropriate actuarial assumptions to specified values determined by provisions of the Plan.
Actuarially determined contribution	The employer's contributions, expressed as a dollar amount or a percentage of covered plan compensation, determined under the Plan's funding policy. The actuarially determined contribution consists of the employer normal cost and the amortization payment.
Amortization method	A method for determining the amortization payment. The most common methods used are level dollar and level percentage of payroll. Under the level dollar method, the amortization payment is one of a stream of payments, all equal, whose actuarial present value is equal to the unfunded actuarial accrued liability. Under the level percentage of pay method, the amortization payment is one of a stream of increasing payments, whose actuarial present value is equal to the unfunded actuarial accrued liability. Under the level percentage of pay method, the stream of payments increases at the assumed rate at which total covered payroll of all active members will increase.
Amortization payment	The portion of the pension plan contribution, or actuarially determined contribution, that is intended to pay off the unfunded actuarial accrued liability.

Appendix A: Definition of Pension Terms

Term	Definition
Assumptions or actuarial assumptions	The estimates upon which the cost of the Plan is calculated, including: Investment return — the rate of investment yield that the Plan will earn over the long-term future; Mortality rates — the rate or probability of death at a given age for employees and retirees; Retirement rates — the rate or probability of retirement at a given age or service; Disability rates — the rate or probability of disability retirement at a given age; Withdrawal rates — the rate or probability at which employees of various ages are expected to leave employment for reasons other than death, disability, or retirement; Salary increase rates — the rates of salary increase due to inflation, real wage growth and merit and promotion increases.
Closed amortization period	A specific number of years that is counted down by one each year, and therefore declines to zero with the passage of time. For example, if the amortization period is initially set at 20 years, it is 19 years at the end of one year, 18 years at the end of two years, etc. See “open amortization period.”
Decrements	Those causes/events due to which a member’s status (active-inactive-retiree-beneficiary) changes, that is: death, retirement, disability, or withdrawal.
Defined benefit plan	A retirement plan in which benefits are defined by a formula based on the member’s compensation, age and/or years of service.
Defined contribution plan	A retirement plan, such as a 401(k) plan, a 403(b) plan, or a 457 plan, in which the contributions to the plan are assigned to an account for each member, the plan’s earnings are allocated to each account, and each member’s benefits are a direct function of the account balance.
Employer normal cost	The portion of the normal cost to be paid by the employer. This is equal to the normal cost less expected member contributions.
Experience study	A periodic review and analysis of the actual experience of the Plan that may lead to a revision of one or more actuarial assumptions. Actual rates of decrement and salary increases are compared to the actuarially assumed values and modified based on recommendations from the Actuary.
Funded ratio	The ratio of the valuation value of assets to the actuarial accrued liability. Plans sometimes also calculate a market funded ratio, using the market value of assets, rather than the valuation value of assets.
GASB 67 and GASB 68	Governmental Accounting Standards Board (GASB) Statements No. 67 and No. 68. These are the governmental accounting standards that set the accounting rules for public retirement systems and the employers that sponsor or contribute to them. Statement No. 68 sets the accounting rules for the employers that sponsor or contribute to public retirement systems, while Statement No. 67 sets the rules for the systems themselves.

Appendix A: Definition of Pension Terms

Term	Definition
Investment return	The rate of earnings of the Plan from its investments, including interest, dividends and capital gain and loss adjustments, computed as a percentage of the average value of the fund. For actuarial purposes, the investment return often reflects a smoothing of the capital gains and losses to avoid significant swings in the value of assets from one year to the next.
Negative amortization	Negative amortization is a result of an increase in the unfunded actuarial accrued liability when the amortization payment is less than the interest accrued on the unfunded actuarial accrued liability.
Net pension liability	The net pension liability is equal to the total pension liability minus the plan fiduciary net position.
Normal cost	The portion of the actuarial present value of future benefits and expenses, if applicable, allocated to a valuation year by the actuarial cost method. Any payment with respect to an unfunded actuarial accrued liability is not part of the normal cost (see “amortization payment”). For pension plan benefits that are provided in part by employee contributions, normal cost refers to the total of member contributions and employer normal cost unless otherwise specifically stated.
Open amortization period	An open amortization period is one which is used to determine the amortization payment but which does not change over time. If the initial period is set as 30 years, the same 30-year period is used in each future year in determining the amortization period.
Plan fiduciary net position	Market value of assets.
Service costs	The portions of the actuarial present value of projected benefit payments that are attributed to valuation years.
Total pension liability	The actuarial accrued liability under the entry age normal cost method and based on the blended discount rate as described in GASB 67 and 68.
Unfunded actuarial accrued liability	The excess of the actuarial accrued liability over the valuation value of assets. This value may be negative, in which case it may be expressed as a negative unfunded actuarial accrued liability, also called the funding surplus or an overfunded actuarial accrued liability.
Valuation date or actuarial valuation date	The date as of which the value of assets is determined and as of which the Actuarial Present Value of Future Benefits is determined. The expected benefits to be paid in the future are discounted to this date.
Valuation value of assets	The actuarial value of assets reduced by the value of non-valuation reserves.

Appendix B: Non-Refundability Factors

Non-Refundability Factors as of December 31

Cost Group and Plan	2024 Legacy Tiers	2024 PEPRA Tiers	2023 Legacy Tiers	2023 PEPRA Tiers
General				
Cost Group 1 – County and Small Districts (Tier 1)	0.9650		0.9680	
• PEPRA Tier 4 (3% COLA)		0.9563		0.9610

Cost Group 11 – San Ramon Valley Fire District	0.9788	0.9824	0.9774	0.9808

Appendix C: Summary of Cost Groups

General Cost Groups and Employers

Cost Group	Employer Name	Benefit Structure	Special Adjustment
1	County General	Tier 1 Enhanced/PEPRA Tier 4	
	Local Agency Formation Commission (LAFCO)	Tier 1 Enhanced/PEPRA Tier 4	Yes
	Contra Costa Mosquito and Vector Control District	Tier 1 Enhanced/PEPRA Tier 4	
	Bethel Island Municipal District (Non-Integrated)	Tier 1 Enhanced/PEPRA Tier 4	
	First 5-Children & Families Commission	Tier 1 Enhanced/PEPRA Tier 4	
	Contra Costa County Employees' Retirement Association	Tier 1 Enhanced/PEPRA Tier 4	
	Superior Court	Tier 1 Enhanced/PEPRA Tier 4	
	Moraga-Orinda Fire District (Non-Integrated)	Tier 1 Enhanced/PEPRA Tier 4	
	San Ramon Valley Fire District (Non-Integrated)	Tier 1 Enhanced/PEPRA Tier 4	
2	County General	Tier 3 Enhanced/PEPRA Tier 5	
	In-Home Supportive Services Authority (IHSS)	Tier 3 Enhanced/PEPRA Tier 5	Yes
	Contra Costa Mosquito and Vector Control District	Tier 3 Enhanced/PEPRA Tier 5	
	Superior Court	Tier 3 Enhanced/PEPRA Tier 5	
3	Central Contra Costa Sanitary District (Non-Integrated) (CCCSD)	Tier 1 Enhanced/PEPRA Tier 4	
4	Contra Costa Housing Authority	Tier 1 Enhanced/PEPRA Tier 4	
5	Contra Costa County Fire Protection District (Non-Integrated) (CCCFPD) ¹	Tier 1 Enhanced/PEPRA Tier 4	
6	Rodeo Sanitary District	Tier 1 Non-Enhanced/PEPRA Tier 4	
	Byron Brentwood Cemetery	Tier 1 Non-Enhanced/PEPRA Tier 4	

¹ Rodeo-Hercules Fire Protection District will be annexed into Contra Costa County Fire Protection District effective July 1, 2025.

Appendix C: Summary of Cost Groups

Safety Cost Groups and Employers

Cost Group	Employer Name	Benefit Structure	Special Adjustment
7	County Safety	Tier A Enhanced/PEPRA Tier D	
8	Contra Costa County Fire Protection District (CCCFPD) ¹	Tier A Enhanced/PEPRA Tier D/E	
9	County Safety ²	Tier C Enhanced/PEPRA Tier E	
10	Moraga-Orinda Fire District	Tier A Enhanced/PEPRA Tier D	
11	San Ramon Valley Fire District	Tier A Enhanced/PEPRA Tier D	

Note: A special adjustment is made for employers that have a remaining balance of special contributions as described on page 126.

¹ Rodeo-Hercules Fire Protection District will be annexed into Contra Costa County Fire Protection District effective July 1, 2025.

² Members hired on or after January 1, 2007.

Appendix D: Allocation of Valuation Assets

Cost Groups 1 through 5 — Cashflow for January 1, 2024 to December 31, 2024
Before reflecting Transfer of Assets for RHFPD to CCCFPD

Line Description	Cost Groups 1 & 2	Cost Group 3	Cost Group 4	Cost Group 5

³ Excludes post-retirement death benefits.

⁴ Allocated based on expected administrative expenses from the prior valuation.

Appendix E: Recommended Employer Rates

The recommended employer contribution rates found on pages 35 through 43 have been shown on an aggregate basis. For purposes of preparing the contribution rate packet, we have included in this Appendix the recommended legacy tier employer contribution rates as of December 31, 2024 for employers who are in Social Security and for employers who are not in Social Security. For completeness, we have also included the PEPRA tier employer contribution rates.
