LAST UPDATE	PROJECT NAME	TYPE OF PROJECT	LOCATION	DESCRIPTION	STATUS
	Encroachments	Trees, fences, bridges, pavers, etc.		owners to remove them. If the encroachment is a fence that is not encroaching on Kinder Morgan's easement, the property owner will be required to enter into a license agreement and pay an annual fee for the encroachment to remain.	on a license agreement with the Assembly of Alamo (church).
	City of Concord Monument Bikeway	License Agreement	Boulevard to Mayette	paved pedestrian and bikeway within the County right-of-way. The County will enter into a license agreement for the City to maintain the improvements. The City and County are working with DTSC to obtain approval for mitigating the arsenic as part of the project.	Email request sent to Real Property on January 3, 2019 to draft License Agreement Amendment with the City of Concord that will transfer to Concord the responsibilities of recurring inspections and reviews of the draft Land Use Covenant with the Department of Toxic Substances Control. Monument Corridor Shared Uses Trail License Agreement Amendment (with the City of Concord) is currently under review by County Counsel. The amendment will transfer reporting responsibilities stipulated in the draft DTSC "Covenant to Restrict Use of Property" to the City of Concord. The County is waiting for DTSC to finlize this document.
8/9/2022	Flood Control Line F1	Storm Drain		and La Serena Court. The proposed project will construct a drainage line that will	Flood Control has finalized pipe alignment working with utility agencies (i.e., Kinder Morgan, CCCSD, EBMUD.) The preferred alignment is between KM line and CCCSD line. The design request is being finalized and will next be sent to the Design Division. (No change.)
	Move IHC Record of Survey to a GIS Layer	Administrative	Corridor-wide	agreements, etc. were updated. Staff is now working on conversion to a GIS layer.	Survey has created a KMZ index for the~100 sheets of the IHC records of surveys. These currently link to an archive on the G drive and Surveys has created another version with the links to point to the public portal (LaserFiche) locations. (Ongoing.)
	Risk Assessment	Administrative	Corridor-wide	assessment will include assembling all sampling data for the IHC, identify areas that have no sampling data and make recommendations on what use can be allowed/not allowed.	ENGEO gathered data. Staff will request County Haz Mat to review/approve recommendations so that staff and the advisory committee will have this information to respond to requests for improvements within the IHC. Ongoing.
	Kinder Morgan Release on South Broadway, Walnut Creek	Ongoing soil and groundwater remediation	Walnut Creek		Arcadis, Kinder Morgan's consultant, conducted a pilot test in August 2023. Air sparging/soil vapor extraction was not particularly effective in cleaning up the site. The RWQCB has approved monitoring and natural attenuation as a potential remediation method. They will be evaluating this over the next few months. (Ongoing) Floating product continues to be found in the immediate vicinity of the spill, but has mostly dissapated at any distance from the spill site. Petroleum products are not being found in surface water.
