Identifying “Hotspots”

CORE teams have valuable insights into high-density encampment areas, but we want to know:
Where else do you observe unsheltered homelessness in your community?

H3 is seeking community input on the following:

- **Locations not meant for habitation:** Are there areas where individuals are living in cars, RVs, vans, or other temporary settings?
- **Density:** Are there specific locations with a high presence of unsheltered homelessness?
- **Accessibility:** Is it necessary to exit a vehicle to observe unsheltered individuals or their sleeping arrangements?
- **Safety concerns:** Are there any known safety issues in these areas that we should be aware of?

The background is a light blue field filled with numerous speech bubbles of various colors (pink, yellow, white, and light blue). Each bubble contains a dark blue question mark. The bubbles are scattered across the entire frame, creating a dense, repeating pattern.
