### From Victim to Survivor to Thriver: Sergio's\* Story

"My journey is just beginning. I am compassionate, adaptable, and super smart.

Right now, my focus is firmly set on environmental science. Nature has always been my haven, where I find peace and a sense of belonging. I am using the lessons I've learned from my challenges to become a leader at my community college, drawing upon past experiences to help others. I also advocate for kids in foster care, deeply personal work, as I've experienced similar paths.

With acceptance letters from three colleges on the table, **deciding where to transfer is my next** exciting step.

Life is so different than what it used to be. What really made the difference was the genuine care and support I received from adults, who consistently checked in on me to make sure I was okay. I'm looking forward to embracing the opportunities to grow and discover more about myself that lie ahead."
