**A Resolution Authorizing the Contra Costa County
Flood Control & Water Conservation District to
Establish an Annual Parcel Assessment for FY 2024-
25 for Drainage Maintenance and National Pollutant
Discharge Elimination System (NPDES) Program**

Resolution No. 24-8

WHEREAS, under the Federal Water Pollution Control Act, [33 U.S.C. Section 1342(p)], certain municipal storm water discharges require a permit from the appropriate federal or state authorities pursuant to the National Discharge Elimination System (NPDES) Program; and

WHEREAS, the City of Concord, in conjunction with other affected jurisdictions within Contra Costa County, applied to the State Regional Water Quality Control Board and received a Joint NPDES Permit to discharge storm water and developed a Storm Water Management Plan; and

WHEREAS, Assembly Bill 2768 (West's Water Code Appendix, Section 63-12 and 63-12.9) authorizes the Contra Costa Flood Control and Water Conservation District (DISTRICT) to establish storm water utility areas and to impose annual benefit assessments for the purpose of carrying out the activities required under the NPDES Program; and

WHEREAS, the DISTRICT has completed the process for formation of a Concord Storm Water Utility Area (SUA), including the adoption of Storm Water Assessment Drainage Ordinance No. 93-47; and

WHEREAS, the SUA and Program Group Costs Payment Agreement between the City of Concord and DISTRICT requires the City of Concord annually to determine the rate to be assessed per Equivalent Runoff Unit (ERU) for the forthcoming fiscal year; and

WHEREAS, the City Council adopted Resolution 93-14, which established the range of annual assessment to be imposed by the DISTRICT within the storm water utility area at an amount not to exceed \$35 per ERU.

//

//

**NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF CONCORD DOES
RESOLVE AS FOLLOWS:**

Section 1. Establishing the annual amount of and authorizing the Contra Costa County Flood Control & Water Conservation District to adopt SUA levies and/or assess ERUs does not constitute a "project," as defined in the California Environmental Quality Act (CEQA) of 1970, as amended, and its Guidelines, under the general rule that CEQA applies only to actions that have the potential to cause a significant effect on the environment. If such action were a "project" then, pursuant Public Resources Code Section 21065, CEQA Guidelines Sections 15060(c), 15061(b)(3), and/or 15378, such action is not subject to environmental review because it will not result in a direct or reasonably foreseeable indirect physical change in the environment, and falls within the "common sense" exemption set forth in CEQA Guidelines Section 15061(b)(3), excluding projects where "it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment." In this case, the Council is only authorizing the amount of the annual parcel assessment for the NPDES program. Additionally, pursuant to Section 15273 of the CEQA Guidelines, the establishment of charges for the purpose of meeting operating expenses is categorically exempt. Projects funded by the annual assessment will undergo CEQA review as necessary. No unusual circumstances exist and none of the exceptions under CEQA Guidelines Section 15300.2 apply. This determination reflects the City's independent judgment and analysis.

Section 2. The annual assessment imposed by the DISTRICT within the storm water utility area for Fiscal Year 2024-25 shall be \$35.00 per Equivalent Runoff Unit (ERU).

Section 3. The City Council requests the DISTRICT to adopt storm water utility area levies based on said amount per ERU.

Section 4. This resolution shall become effective immediately upon its passage and adoption.

Report Title: Adopt Resolution Requesting that the Flood Control District Adopt Annual Parcel Assessments for the County's Watershed Program. Project #7517-6W7091

☒ Recommendation of the County Administrator ☐ Recommendation of Board Committee

RECOMMENDATIONS:

ADOPT Resolution establishing a rate of \$30 per Equivalent Runoff Unit (ERU) for Stormwater Utility Area 17 (Unincorporated County) for Fiscal Year 2024-2025 and requesting that the Contra Costa County Flood Control and Water Conservation District (FC District) adopt annual parcel assessments for drainage maintenance and the National Pollutant Discharge Elimination System Program, Countywide.

FISCAL IMPACT:

The 2024-2025 rate per ERU is the same as that set for fiscal year 2023-2024. Therefore, there will be no change in rate for Unincorporated County property owners. The unincorporated area of Contra Costa County will produce approximately \$3,653,028 which will be used to implement the Unincorporated County's Stormwater Program. All associated costs are funded 100% by Stormwater Utility Area 17 Funds.

BACKGROUND:

The Clean Water Program consists of the County, Contra Costa cities, and the FC District working together to prevent, reduce, or eliminate the discharge of pollutants into the storm drain system, including creeks and other natural waterways. The Clean Water Program was established in response to changes in the Federal Clean Water Act. The Clean Water permitting program is known as the National Pollutant Discharge Elimination System (NPDES) Program. To be in compliance with the current Municipal Regional Stormwater NPDES Permit (MRP), Clean Water Program participants implement stormwater programs to comply with the

provisions outlined in the MRP. These stormwater programs are paid for with stormwater utility fee assessments. Adoption of the attached resolution will begin the annual process of assessment adoption.

The Board of Supervisors is being asked to set a rate of \$30 for one ERU in the Unincorporated County areas and to request that the FC District adopt the stormwater utility assessment. (The FC District is the only entity under state law with legal authority to assess this particular assessment.)

The Public Works Department administers the County Stormwater Program. Examples of how the assessment is being spent in the current year include:

1. Work with County Building Inspection and Public Works inspectors and construction companies/contractors to reduce construction contaminants, such as paint, cement, oil/fuels, and soil erosion from entering storm drains and creeks.
2. Encourage Planners and the development community to use new designs that will reduce contaminated stormwater runoff.
3. Educate the public on the benefits of reducing pesticides and other toxic household product use and their proper disposal.
4. Educate County Engineers and Maintenance staff on flood control design, construction, and maintenance practices that protect water quality and preserve natural watershed habitats.
5. Inspect industrial and commercial businesses for evidence that spill prevention, equipment maintenance and cleaning, waste handling and disposal, and other business practices are done in a manner that minimizes stormwater contamination.
6. Educate marina operators and their marina users through a marina program.
7. Implement trash reduction control measures.

CONSEQUENCE OF NEGATIVE ACTION:

If the rate per ERU is not set for the coming fiscal year, funds will not be available for the County's Watershed Program to comply with the MRP. The San Francisco Regional Water Quality Control Board has the authority to issue fines of up to \$10,000 per day against those municipalities that do not comply with the MRP and fail to implement the stormwater programs in compliance with the MRP provisions.
