- 2. REVIEW County Data for the Data Walk Activity**

See attached slide deck. Staff walked through the data and information. Subcommittee had thorough discussion.

#### Misdemeanor Arrests:

- Can we see the traffic stop data? Traffic stops are subjective.
- Other jurisdictions have decreased traffic stops, can we see their best practices
- RIPA data on traffic stops is fairly successful; but not reliable nor consistent nor complete
- Can it be DV? Vandalism? Call for service? Wobblers? More likely than traffic.
- Can we pick the 5 largest cities? Violent and non-violent? Get more nuanced.
  - Jurisdiction? Neighborhood? Compare to national numbers
  - Gender? race?
  - Calls for service?
  - Self-initiated?
  - Consensual encounters?
- FBI site does break down by Police Agency, race
- Macro-level is still valuable
- Can we recommend the adding of fields on the stop forms?
- Do we start with a test case?
  - i.e.: Look at a sub-group of all misdemeanors in February?

#### Probation:

- Compare racial breakdown from arrest -> conviction -> sentence -> detention -> probation
- CDCR is the source (by county; will not do by city nor by individual) (by county; crime, offense, gender, race)

#### Next Steps:

- Melvin Willis will review a handful of local PD dashboards
- Come up with questions/indicators/recommendations
- Keep the same color (as much as possible)
- Consider a County dashboard that includes
- Add caveat/context language (i.e. Hispanic not counted in FBI data set; Asians included in Other; RIPA caveat; story of young man)
- Recommend a County dashboard and what to be included

#### **Public Comment:**

*No comment.*

*No action required.*

### **3. DISCUSS any general updates from subcommittee members or ORESJ staff.**
